

# THE BLAIRMORE ENTERPRISE

VOL. XVII, NO. 22

THE BLAIRMORE ENTERPRISE,

THURSDAY, SEPTEMBER 30, 1926

22ND ST. - ALBERTA

## INQUEST IS ADJOURNED

The inquest into the explosion in Hillcrest mine, by which two men lost their lives on the evening of the 19th of September, was commenced at Hillcrest on Wednesday afternoon of this week.

John T. Sterling, chief inspector of mines was present. Coroner Joseph Robertson presided. A revision of

## SUNDAY SCHOOL RALLY DAY

On Sunday afternoon next, the children of the Junior Sunday school of the United church will hold their annual rally.

The list of jurors was found necessary under the Mines Act, and an adjournment was made to the 20th of October.

## ALEX. WILSON IS KILLED AT CALGARY

Alex. Wilson, former employee as welder at the Blaimore Iron Works, was killed instantly, when an acetylene tank he was testing at the plant of the Riverside Iron Works, Calgary, exploded, hurling him about fifty feet through the air and hattering his body beyond recognition.

The late Mr. Wilson came to Alberta in 1921 from Aberdeen, Scotland, accompanied by his father, who at present resides in Calgary. He has since been joined by Mrs. Wilson. He is survived, besides his wife, father and mother, by one brother, George, and two sisters.

## FIRST UNIT ALBERTA COLLEGE READY FOR OCCUPATION

The Edmonton Bulletin of September 18th gave the following description of the new building:

The new Alberta College, the first unit of which has just been completed and is shortly to be opened, is without a doubt one of the landmarks of modern Edmonton. Its location, in the middle of the city, alongside the beautiful Memorial Hall, built to commemorate the part Edmonton's sons played during the great world war, and immediately facing the majestic Carnegie free library, is hard to equal. Set high on the banks of the Saskatchewan river, immediately overlooking it, it has a setting which is impossible to rival. From the upper stories, mile upon mile of rolling prairie, glistening gold in the harvest sun, studded here and there with prosperous farmhouses and buildings, is the view that reaches the eye. Right around it the busy life of a thriving city ebbs and flows.

The present building is the first unit of a large structure which will eventually house the classes of the Alberta College. This unit has an area of 40 by 100 feet and is composed of three storeys and basement. It is built in Gothic style of reinforced concrete throughout and is lined with tapestry brick and Indiana limestone. In the basement is a laboratory for chemistry giving accommodation for fifty students, together with a science lecture room. On the first floor are four large classrooms, two of which are separated by a removable partition so that the whole as required may be thrown open for use as an assembly hall. The second and third floors have their space allotted for dormitories, capable of accommodating forty-five girls or young women. The building is absolutely fire-proof and has every convenience for the comfort and safety of its residents.

The new unit was officially opened yesterday, with Dr. J. W. Graham, of Toronto, delivering the dedicatory address.

The principal of Alberta College is Rev. F. Stacey McCall, who for a time was pastor of Knox church, Frank, and is well known to citizens of The Pass.

Something to worry about: In a pack of cards there are 635,913,559, 600 whist hands. This has been proven by a local whist shark.

## Ladies, Attention !!

A Representative of Heath's, Calgary will be at the store of Mrs. Stephenson

Tuesday, October 5th With a Full Display of FALL AND WINTER COATS AND DRESSES

HEATH'S are Calgary's most popular Ready-to-Wear House and their goods are always attractive, both in quality and price.

## DEERING APPEAL IS DISMISSED WITH COSTS

Mrs. Margaret Deering, of Bellevue, entered action in the supreme court against Alfred Connelly, of Pincher Station, who was the executor of the will of the late Robert Connelly, of Bellevue, claiming payment of the sum of \$360 as a quantum meruit for wages earned by her as housekeeper for Robert Connelly for six years prior to his death.

The action was tried before His Lordship Mr. Justice Ives at Macleod on May 10 last, when his lordship dismissed the action against the executor with costs. Mrs. Deering appealed this decision to the appellate division of the supreme court and the appeal was heard on Monday, September 20, before the judges of the appellate division.

Their lordships have now given judgment, dismissing Mrs. Deering's appeal with costs. They find that Mrs. Deering was not in ordinary sense an employee, see no ground for imposing a legal liability upon the deceased to pay her anything in the nature of wages, as claimed.

Messrs. Ostlund & Brown, of Lethbridge, were solicitors and counsel for Mrs. Deering, and Messrs. Thomson & Jackson, of Pincher Creek, were solicitors and counsel for the Connelly estate.

## "THE BRITISH CANADIAN"

"The British Canadian" is the latest publication to arrive at our office. It is devoted to the interests of the British Empire and is the official organ of the Empire Club of Canada (Winnipeg Unit). Its object is the advancement of the interests of Canada and a United Empire.

The publishers are The St. George Corporation Limited, Fashion Craft Building, Winnipeg, and Percy G. Leaney is the editor, who is also secretary of the Winnipeg Unit of the Empire Club of Canada, the Royal Society of St. George (Winnipeg branch) and the St. George's Club, and president of the Imperial London Association.

"The British Canadian" commenced with sixteen pages and it is intended to double its size and increase its circulation to at least 10,000 at an early date.

## GRAVELLED-HIGHWAY UNNECESSARILY CRIPPLED

The protracted wet spell has had the usual effect on the roads and travelling by motor has only been possible at intervals. The gravelled road from Pincher to The Pass would be a "joy forever" were it not for the impassable condition of the main street of Cowley. In fact it has been necessary to "haul out" many cars attempting to get through. The first question of the day is, what to do about the weather—the second, what to do about that "impassable condition" of the Cowley portion of the gravelled highway. The latter seems to be a question that only the provincial government can answer, and should be answered in a practical way at the earliest possible moment by some plan or other.—Pincher Creek Echo.

## ST. LUKE'S, BLAIRMORE

Services for October  
Oct. 3—Evening at 7 p.m.  
Oct. 10—Matsins, 11 a.m.

Oct. 31—Matsins and Litany at 11 a.m.  
Sunday School every Sunday at 2 p.m.  
A. D. CURRIE, Vicar.

## REMAINS OF FRANCIS LOTE LAID TO REST AT HILLCREST

The funeral of the late Francis Lote, one of the victims of last week's explosion in the Hillcrest mine, took place on Friday afternoon last and was very largely attended.

The arrangements were in charge of the members of Sentinel Lodge, A. F. & A. M. Following a short service at the home, the procession proceeded to the United church, where a public service was held, conducted by Rev. Bro. C. S. Pinder. The church was crowded to overflowing with sympathizing friends.

The remains were laid to rest in Hillcrest cemetery.

The members of the United church choir, together with members of the Board and Sunday school, met at the home of Rev. W. T. Young on Monday evening to bid farewell to Mr. and Mrs. Thomas Dawson, who left on Wednesday morning for Calgary. Mr. Dawson was presented with a beautiful bible as a token of esteem and appreciation for his work in the various branches of the church.

## CARD OF THANKS

Mrs. F. Lote, sons and daughters, desire through The Enterprise to thank the many kind friends for assistance in the search for Mr. Lote, and for various expressions of sympathy extended to them in the loss of their dear husband and father.

Following is a list of floral tributes: Gates ajar, Wife and Family; wreath, Grand Children; emblem, Sentinel Lodge, A. F. & A. M., Hillcrest; wreath, Hillcrest Mine Officials; spray, Teaching Staff; cross, Mrs. L. Dutil and Family; wreath, G. Mansell and Family; J. Mansell and Family; J. Ironmonger and Family; F. M. Thompson and Family; S. H. Turner and Family; C. Evans and Family; R. Richards and Family; S. Ennis and Family; H. Westrup and Family; G. Crulekshank and Family; J. Mackie and Family; S. Marshall and Family; P. Montalbetti and Family; H. Pinkey and Family.

An urgent meeting of Blaimore Lodge No. 68, I.O.O.F., is called for Sunday night next, October 5th, at 8 o'clock sharp. All members are requested to attend.

## When He Is Away

FOR the mutual use of two or more persons a Joint Account is a great convenience.

With a Joint Account, a wife may deposit or withdraw money when her husband is away or cannot get to the bank during business hours.

Our folder, "For the Convenience of Your Wife," explains Joint Accounts. Ask for a copy

### Immigration, Work and Prosperity

Notwithstanding that one of Canada's greatest needs is a larger population, the amazing fact is that whenever immigration shows a substantial increase, and it becomes apparent that the tide of settlement is setting in strongly, Canada-wide, an outcry is raised in Labor circles and influences are brought to bear to discourage immigration. Nor is organized labor alone in raising objections and offering opposition. Frequently church bodies, and sometimes national societies, adopt the same attitude.

This opposition to immigration sometimes finds expression in an attempt to induce the government and other agencies interested in immigration to discontinue, or greatly curtail, their efforts to induce immigration to Canada. At other times it is revealed by a campaign of the most mischievous, misleading and, not infrequently, absolutely false statements regarding Canadian conditions, a most unpatriotic proceeding.

Most of this opposition is the result of ignorance or the acceptance of half-baked theories on the part of those who seek to prevent or restrict immigration. Some people object to anybody being allowed to enter Canada unless they speak the same language, dress in the same fashion, and worship at the same altar as they themselves do. These timid souls are fearful that they may be swamped, and they insist on Canada being regarded as a special preserve for themselves set apart in the world by an all-wise Providence with "No admittance" signs against people from other lands. They refuse to recognize the fact that all the great national groups of today, including the British, are the result of a fusion, an assimilation, of races.

Organized labor, on the other hand, opposes immigration because a majority of Labor Union members entertain the mistaken idea that by maintaining a scarcity of labor, the opportunities for employment of those already in the country are enhanced, and that higher wages will likewise prevail. The economic and industrial history of the world proves otherwise.

A Melbourne, Australia, man writing in the London Daily Mail declares that progress and development in Australia are both being stifled and held back by the excessive cost of labor. One of the crying needs of Australia is to bring about permanent prosperity by the carrying out of irrigation schemes on a huge scale. The recent drought has once again emphasized the old lesson, and it is known that under the benign skies of Australia simple methods of irrigation like those practiced by the peasants of Lombardy would produce astonishing results. But the problem of Australian irrigation is said to be like a hundred other problems there, it is easy to point out what might be done and what should be done, but much more difficult to get it done. The high cost of labor makes it impossible. As a result the farmer and his family struggles along as best they can with rude skill and appliances, but with low efficiency, postponed improvements, and backwardness of agricultural development.

The Labor Unionist looks on immigration as threatening his employment and as a menace to the established standard of wages. He refuses to see that a still greater menace lies in the retarded development of his country, but that development would bring increased employment and good wages for all. He overlooks the fact that immigration, upon a scale which Australia will almost certainly never experience, had little or no effect upon the standard of employment and wages in the United States; rather did it maintain that standard by incessant expansion. The one thing to keep up, or augment, wages in Australia, or in Canada for that matter, would be great areas of development. Compared with what it might be the rate of present development is slow.

The most prosperous period in Canada in the experience of the present generation was during those years following the introduction of an aggressive immigration policy under Clifford Sifton, and when immigrants were pouring into the country. Following the depression of the after-the-war years Canada is once again experiencing better times and an increasing measure of industrial activity and prosperity, with employment plentiful and wages good, and at the same time immigration is heavier, than at any time since the outbreak of the war, with an increase of 68 per cent over last year.

And because of this increase immigration, once again the cry is raised to put a stop to it. Canadians as a whole are asked by one section of the population, and for purely selfish and utterly mistaken reasons, to kill the goose that is laying the golden eggs for the Dominion of the present day, while at the same time being productive of a greater development and more prosperous future.

#### Cobra Deaf to Sound

The cobra is deaf to all sounds, its hearing apparatus consisting of a delicate membrane which receives only ground vibrations. Indian charmers, knowing this, tap the box or basket in which the reptile is kept, partly stunning the creature by the force of the vibrations. It is thus rendered tractable so it can be handled.

#### Young Mrs. Green (at the bank teller's window)—I wish to open an account here.

Teller—Very well, madam. How much do you want to deposit?

Mrs. Green—Why, nothing. I want to draw out forty dollars.

It might be possible for a man to write a sensible love letter, but he seldom does.

#### Will Not Eliminate Fools

Perhaps the effort to invent a "fool proof" airplane will be successful. There is no reason to doubt that aviation will become safer as human ingenuity develops new devices. But "fool proof" is a large claim. Old means of transportation are no that. And the supply of fools is not likely to be exhausted.

#### Coal in Sardinia

Vast coal and iron fields have been discovered at Perduogio, in the province of Cagliari, Sardinia. The coal, estimated to total 50,000,000 tons, is said to belong to the same class as English anthracite.

Eve may have been happy, and all that, but she had no neighbors to borrow things from.

#### Peace River Coal

Millions of Tons Superior to Highest Grade American Coal

There are millions of tons of very high grade bituminous coal in the Peace River district of Alberta, of a quality superior to the highest grade of American coal, according to D. H. McDougall, former general manager of the Dominion Iron and Steel Company and vice-president of the Empire Steel Corporation, who is in Halifax after a visit to the Alberta coal deposits, about which he has prepared a report.

Mr. McDougall said he did not think the development of these coal fields would affect the coal industry in Eastern Canada, as Alberta coal would always find a ready market along the Pacific coast of the United States.

He described the Peace River district deposits as being the "greatest in Canada" and said they were available for mining at the lowest operating costs.

### Pain In The Muscles, Stiffness In Joints, Quickly Subdued By Nerviline.

Those who have tested out numerous liniments will agree that where something is sore, it is sore. Deep-seated, more or less chronic rheumatism there is nothing to compare with Nerviline. It is because Nerviline penetrates so deeply, because it has about five times the strength of the ordinary oil preparations. It has come to be known as King over all Pains. For rheumatic conditions, muscular and joint stiffness, Nerviline is the wonder. A trial proves this. Get a 35 cent bottle from your dealer to-day.

#### Clergymen Live Longest

Live Longer Than Any Other Class of Men in England

What is the healthiest job in England? Clergymen live longer than any other class of men, the government statisticians of Somerset House show. Gamekeepers on the great estates, printers, gardeners and makers of candles and oil, closely followed the preachers in the longevity records.

### WHEN YOUNG GIRLS GROW PALE AND THIN

Dr. Williams' Pink Pills Should Be Taken to Enrich the Blood.

When girls grow weak, pale and thin, the parents should be warned of the danger. It is the greatest danger of the girl in her teens cannot develop into robust womanhood without an abundant supply of rich, red blood in her veins. It is the lack of this that is the greatest danger of the girl out of ten. Dr. Williams' Pink Pills have achieved world-wide fame for their remarkable blood-enriching properties. In these pills there is iron, health, with glowing cheeks and sparkling eyes for every weak, pale girl. The value of the pills in cases of this kind is shown by the statement of Mrs. Winifred Ratty, Barton street, Hants. She says: "About two years ago my eldest girl got into very bad health. I took her to a doctor who advised having her tonsils removed, saying this was the cause of the trouble. We had them removed, but it did not help her, and she seemed to have absorbed so much poison from the trouble that she did not pick up at all. She could neither eat nor sleep, and what food she did take would not digest. Then she developed a cough and kept her awake at night, and went down in weight to 35 pounds. A neighbor said to me, 'You have had to do many things why not try Dr. Williams' Pink Pills?' I got some and before she finished the second bottle she was showing improvement. She continued the use of the pills for some time and now she is the picture of health, able to work and play, and eat and sleep with all her old-time vigor. These statements can be verified by neighbors who watched her restored to full health to perfect health."

If your medicine dealer does not keep these pills you can get them by mail at 50c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

#### University to Receive Grant

The University of Saskatchewan, which for the past two years has been conducting special courses for field men for lending libraries, has received a grant of \$15,000 from the Dominion Mortgage and Investments Association, in recognition of the value of this work, to financial institutions.

#### Vancouver a Busy Port

According to statistics prepared by the Vancouver Merchants' Exchange the foreign trade export of the port has increased 400 per cent in the past five years, while the import trade has increased 51 per cent.

#### Worms in Children, If they be not attended to, cause convulsions, and often death. Mother Graves' Worm Exterminator will protect the children from these distressing afflictions.

It is common knowledge to Arctic and Antarctic explorers that sea-ice more than a year old is entirely free from salt, although new ice contains the same amount of salt as sea water.

Minard's Liniment for chapped hands.

### Cuticura Soap Is Refreshing After Outdoor Exercise

Warm baths with Cuticura Soap, after outdoor exercise, cleanse, cool, and refresh the skin. Assisted by Cuticura Ointment they do much to allay irritation, redness and roughness of the face and hands and keep the skin soft and clear under all conditions of exposure.

Sample Size Free by Mail. Address: Cuticura Soap Co., P.O. Box 100, Portland, Me., U.S.A.

Canadians Own Jersey Bull Is Declared Grand Champion at Philadelphia Exhibition

A Canadian-owned animal, "Home of the Oxford Land" has been declared grand champion Jersey bull at the annual exhibition, exhibited at Philadelphia. The animal was recently shipped from Brampton, Ont., and belongs to the herd of B. H. Ball and Sons, "Benelinde Oxford Land" was declared grand champion bull at the Royal Winter Fair in Toronto last year.

#### In the competition for sheep, A. H. McLean and Sons, Kerwood, Ont., carried off the grand championships ram and ewes, also premier breeder and exhibitor awards. Associated Press Despatch.

#### Would Help Revive Trade

English Manufacturers Hoping Prince Will Wear Straw Hat

Lately the English town, which is now making straw hats for the adornment of hundreds of thousands of heads next summer, wants to see the Prince of Wales wearing one. It would be enough, thinks Laiton, to revive a custom rapidly becoming extinct in England.

According to manufacturers Londoners buy fewer straw hats every year, probably because of the scarcity of hot weather and too much rain. Laiton is still prosperous because of the large foreign trade, but it would, of course, be far more prosperous if Englishmen kept straw among their usual large collection of hats.

When Asthma Comes do not despair. Turn at once to the help offered by Dr. D. Kellogg's Asthma Remedy. This wonderful remedy will give you the aid you need so surely. Choking coughs, breathing become natural and without effort. Others, thousands of them, have suffered and suffered, but have wisely turned to this famous remedy and ceased to suffer. Get a package this very day.

Carry Fish by Airplane

Dr. Chalmers Mitchell, secretary to the Zoological Society of London, flew from Paris to London recently in a Handley Page Napier air liner of the Imperial Airways, bringing in two tanks 400 sea horses, caught the previous night in the Bay of Biscay, to replenish the tanks at the London Zoo aquarium.

#### No Hunters Need Apply

Travellers in South America Must Take Things Easy

An interesting discovery has been made by firms in the United States that are trying to make business connections with Central and South America. They find that their most useful representatives are not 100 per cent efficient hunters of the Rabbit type, but men from Louisiana and Mississippi, who take life more quietly and easily. "Go-getters," it is declared, "are not worth a darn" on the other side of the Atlantic, with the so-called "lazy Southerners," with their restful attitudes and more ceremonious manners, has no difficulty in adapting himself to the ways of the Latin American and making the social contacts in that part of the world are essential to profitable trade. —Manchester Guardian.

#### TEETHING BABIES DIE EVERY SUMMER

The hot weather is very hard on babies starting to cut their teeth. On the first signs of any looseness of the bowels the mother should give a few doses of

#### MEET SUCCESS ON CANADIAN FARMS

Successful on Canadian farms have been young bachelors who, prior to residence in this country were students in agriculture at the Haldimand Salvation Army Schools in Essex, England, that the Army will shortly receive into training the first class of married men destined for farm lands in the Dominion. The course will be given during six months, and will mean a thorough training in branches of agriculture, particularly adapted to conditions in Canada.

#### A Corrector of Pulmonary Troubles.

Many testimonials could be presented showing the great efficacy of Dr. Thompson's Electric Oil in correcting disorders of the respiratory processes, but the best testimonial is experience and the oil is recommended by all who suffer from these disorders with the certainty that they will find relief. It is the only remedy for inflammation in the bronchial tubes.

After a man has eaten everything set before him he wonders what ails him.

Somewhere when a man goes into a crowd he thinks that he is the only one in a hurry.

Foot sore?—Minard's Liniment

W. N. U. 1648

#### Germany's Newest Card

Germany will return to power in the late Mr. Gird, president of the chamber of deputies army commission, wrote in an "Inter-view" published in Paris, urging France to be on guard against "tremendous preparations for air supremacy now going on in Germany."

"Demilitarization on the Rhine has removed the real menace," Gen. Gird said. "But progress and science have aided Germany to raise its head elsewhere and to seek to recover its fortunes in the clouds. Germany is free to construct commercial planes, by recent abrogation of the larger part of the restrictions imposed by the treaty of Versailles, and it is embarked on a great aviation dream. On its air fleet is built its hope of coming victory."

Continuing, the general said: "Germany will to recover its place in the world in the fact that it is covering all air ports and is covering all continents with airports, commercial lines, and transit stations, invading all nations and the great highways of the world."

Germany's principal engineers, chemists, and aerodynamists are working free of all control by the Inter-Allied commission in Copenhagen, Amsterdam, Italy, and Russia. Gen. Gird asserts, mentioning the names of Heinkel, Fokker, Junker and Fokker.

"We will be surprised suddenly to see the wings of the fleet traverse the oceans, touch the poles, and embrace Europe and Asia, by virtue of its camouflaged budget it allows as much for aeronautics as the whole war budget before 1914," the general asserts.

#### From School Teacher To Great Emulience

A young man who was brought up on a farm in Western Pennsylvania studied diligently and qualified for district school teacher. Further pursuing his studies and teaching he managed to save up enough money to put him thru medical college. After the Civil War, he began the practice of medicine in the new oil section of Pa., and often rode horse-back thru the woods to reach and relieve those who were seriously ill. He was a student of nature, knew and could easily recognize most of the medicinal plants growing in the woods, and the best known blood medicine and tonic. More than fifty million bottles have been sold. If your druggist does not sell the "Discovery" in liquid or tablets, you can obtain a trial pkg. of the tablets by sending 10c to Dr. Pierce's Branch Laboratory in Bridgport, Conn.

#### Wireless in the Arctic

Wireless Phone Spans a Distance of 1,200 Miles

Twelve hundred miles was the distance spanned in what is believed to have been the first long distance wireless phone conversation carried on from the Arctic Ocean, it was learned upon the arrival in Vancouver of the Hudson's Bay Company's fur trading steamer Baychimo, with a cargo of furs from the North valued at \$150,000.

Last July, when the Baychimo was sailing in the Western Arctic, connection was established by her wireless operator, D. Mitchell, with another of the company's vessels, the Bay-Rupert, near the northern entrance of Hudson's Bay, and successful conversations were held between officers of the two ships on two successive nights.

Many an indigent husband allows the indulgence to stop with himself.

### Cold In Head Clogged Nostrils

Ringing Ears and Buzzing Head Noises Quickly and Pleasantly Relieved By Simple Worm-wood Treatment

No more hawking, spitting or blowing, dry ticklings, dull headaches or burning in the nostrils. Use Georo Wormwood Balm in your nostrils twice a day, and you may bid goodbye to catarrh and troublesome head colds. The pleasant, cooling and soothing fragrance of this old-time Woodcock treatment promptly penetrates all through the air passages of the nose and throat—your clogged nostrils quickly begin "ringing" noises—stop—your head feels clear and cool.

Put your faith in Georo Wormwood Balm and you won't need to stuff your head with a variety of cold or catarrh. At all good druggists—at little cost.

### HUNTERS

Pack a bottle of Minard's Liniment in your kit. Best remedy for sprains, bruises, flesh wounds, colds and sore feet.

**Children Cry for**

**Fletcher's CASTORIA**

MOTHER—Fletcher's CASTORIA is a pleasant, harmless Substitute for Castor Oil, Purgative, Teething Drops and Soothing Syrups, especially prepared for Infants in arms and Children all ages.

To avoid imitations, always look for the signature of **Dr. J. C. Fletcher**. Proven directions on each package. Physicians everywhere recommend it.

## THREE COUNTRIES SHOULD CONTROL WORLD'S WHEAT

Vancouver, B.C.—The Vancouver Province publishes the following cable from Sydney, Australia:

"Canada, Australia and the Argentine, the world's three principal wheat-producing countries, should control the world's wheat," declared Henry W. Wood, president of the Alberta Cooperative Wheat Pool, during the course of an address at a banquet tendered him by co-operative wheat interests here.

"The three countries," said Mr. Wood, "produced approximately 600,000,000 bushels of the world's exportable wheat surplus, which was about 700,000,000."

"If they set out to get control of the markets of the world, by a campaign of organized, systematic co-operation, there will be time to tell them nay," declared Mr. Wood.

## Labor Men Denounce Senate

Should Be Reformed Is Opinion of Delegates to Congress

Montreal.—Denunciation of the Canadian Senate as the body which stands in the way of the realization of labor's legislative hopes was a feature of a session of the forty-second annual convention of the Dominion Trades and Labor Congress held here. The incoming executive was instructed to do all in its power either toward abolition of the Senate or its reform.

Delegates pointed out it would be a difficult thing to abolish the Senate entirely, but all felt reforms must be brought about. Miss Mary McNab, Toronto, organizer of the textile workers, described the Senate as a worn out tool, reminiscent of the day of ox wagons in Canada, aged in mind and in body.

## Prize To Wheat Winner

C. P. R. Again Offering Prize of \$100 for Highest Points at Chicago Show

Winnipeg.—Following the practice of recent years the Canadian Pacific Railway Company is again awarding a prize of \$100 to the Canadian section of the highest number of points in hard wheat at the International Hay and Grain show to be held in Chicago the first week in December.

In past years, with but one or two exceptions, the winner of this prize has also proved to be the winner of the world's championship in wheat.

## Dempsey Meets His Match

Gene Tunney Defeats Former Champion in Savagely Fight

Philadelphia.—Gene Tunney won the heavyweight championship of the world in a pouring rain here, when he defeated Jack Dempsey in a savage fight that went the ten round limit.

Both judges were unanimous in declaring the blonde ex-fighter the winner.

Tunney came within an ace of knocking Dempsey out in the first round, when he planted a hard right to the jaw, just before the bell rang.

Artists Degrade in Berlin

Berlin.—More than 5,000 destitute artists of all branches are included in the army of Berlin's unemployed. Of these artists who are unable to find work, 635 are actors, 389 painters, 238 opera singers, 102 sculptors and 59 writers.

Warships Ordered To China

Malta.—Nine British warships, consisting of the entire British fleet of the Mediterranean, have suddenly been detached from their station and are now steaming toward China, to reinforce H.M.S. Garter, Cardiff and Dartmouth recently ordered to China.

Take Refuge on U.S. Ships

Ten Tain.—Renewed demonstrations of hostility against the British in Yangtze-Kiang River Valley caused many British nationals to take refuge aboard the United States warships patrolling the river.

Want Economic Conference

Geneva.—The League of Nations Assembly has adopted a resolution calling for a world-wide economic conference. Germany was stated to be heartily in favor of the conference.

Royal Wedding in December

Brussels, Belgium.—The wedding of Crown Prince Leopold to Princess Astrid has been provisionally fixed for some time in December.

W. N. U. 1448

## Work On H. B. Railway

Expected 1,000 Men Will Be Employed Until End of Season

The Pas, Man.—Two hundred miles of track on the Hudson's Bay Railway has reached first stage. It is now good for trains running 50 miles per hour and with final lift in the spring it will be in first class condition and ready for anything.

This track is 175 miles long, the present end of the line, which point will be reached fairly soon.

254 gangs are working both ways to finish the work on the intervening gap. The pioneer gang is at Mile 217, 26 miles from Kettle River bridge, the present end of the line, which point will be reached fairly soon.

Cuts have all been widened and drained and gangs are at work renewing and replacing wooden bridges. Four carpenter crews are erecting wooden trestles. The trestles are not in shape and in operation as far as Mile 317.

Two steam shovels have been continuously working at Mile 127 and 254 respectively with six trains disposed of the output.

Three hundred and twenty thousand ties have been distributed during the season, 265,000 of which have been placed in the road, all except 100,000 being crisscrossed, that ensuring all permanent.

The number of men employed is increasing. A month ago it was 700, now there are 825 on the payroll and another big gang is expected tomorrow.

Sydney, N.S.—The old wooden main-of-war, Pelican, once one of the smartest vessels of the British North American squadron, was sunk at her moorings here election night by two seaboys who opened her seawater valves. She now lies in 25 feet of water, and an effort will be made to raise her next spring. Citizens of Sydney are planning to purchase the old vessel.

Sea Valves on Old Man-of-War Opened by Mischievous Boys

Sydney, N.S.—The old wooden main-of-war, Pelican, once one of the smartest vessels of the British North American squadron, was sunk at her moorings here election night by two seaboys who opened her seawater valves. She now lies in 25 feet of water, and an effort will be made to raise her next spring. Citizens of Sydney are planning to purchase the old vessel.

SEND OUT APPEAL FROM FLORIDA FOR RELIEF FUNDS

Miami, Fla.—Prostrate under the ravages of the tropical hurricane and with suffering among the injured and homeless almost indescribable, Miami has appealed to the people of the United States for a vast sum for relief and rehabilitation work.

The message went out immediately after Henry M. Baker, National director of disaster relief for the American Red Cross, had arrived here and taken charge of the relief work in all of the stricken districts of Florida.

While awaiting a response to its urgent cry for help, the city, with aid of federal, state and other agencies, went doggedly about with its relief work. Thousands of doctors, nurses, soldiers, sailors and other relief workers labored to care for the injured and homeless and to recover the dead still imprisoned in many of the 6,000 homes that were wrecked and in the debris-strewn waters of Biscayne Bay.

The force on hand is proving inadequate for the task. Red Cross headquarters announced that additional nurses were urgently needed as well as serum for use in preventing epidemics. Aeroplanes have been brought in Antiochia and as far as they arrive are sent northward again for additional supplies.

## For The Public Health

Need Widespread Campaign to Educate the General Public

Saskatoon.—The necessity of a widespread campaign to educate the general public as to the means of combating epidemic, small pox and typhoid fever, was strongly emphasized by Dr. H. H. Seymour, department of public health, Regina, in addressing the Saskatchewan Medical Association in session at the University of Saskatchewan.

The speaker suggested a definite plan of action which provided for the co-operation of the medical men, the Department of Education, the press, the clergy and every other organization that could further the work.

The association expressed its complete endorsement of the scheme.

Other speakers were Dr. E. E. Shepley, Saskatoon; Dr. J. S. Brown, St. Catharines; Dr. George C. Hale, London, Ont.; and Dr. W. R. Cokes, Regina.

## Call Conservative Conference

Gathering to be Held at Ottawa on October 11th

Ottawa.—A meeting of Conservative members of Parliament and defeated Conservative candidates has been called for at Ottawa on October 11th. An official notice has been issued from Conservative headquarters in Ottawa to Conservative Senators, Conservative members of the House of Commons and unsuccessful Conservative candidates in the recent election of a gathering to be held in the Parliament Buildings on that date. The object of the meeting is "to consider the course to be pursued by the Conservative Party in the forthcoming session."

French Regret Corsica Incident

Rome.—The French government has conveyed to Premier Mussolini its regret at the recent incident at Bastia, Corsica, where crowds attacked the Italian consulate and obliged Italian ships in the harbor to hoist the French flag. The communication says the French government has ordered a severe investigation and exemplary punishment of those found guilty.

## Airplanes Lost in Storm

Mobile, Ala.—Thirty-five aeroplanes at the Pensacola naval station were lost in the storm that isolated Pensacola for more than 24 hours, the Associated Press reported. There had been no loss of life, but property loss would reach \$2,000,000.

The aeroplanes cost \$45,000 each, and are practically a total loss. Loss to the naval station was heavy.

## Exact Heavy Fines

Winnipeg.—Fines in excess of \$4,000 were imposed on violators of the Manitoba Temperance Act in police court here. The Crown secured convictions in 15 out of 27 cases brought to trial. Forty cases were remanded. It was the heaviest docket in many years.

## Sees Another Labor Government For Britain

MacDonald Party Will Win in the Next Election Says Hon. F. O. Roberts

Montreal.—Predictions that in the next general British elections the Labor Party with Ramsey MacDonald at its head would be returned to office with a sufficient majority to shape and put into effect those policies which the working men so far had been unable to obtain through industrial organization, even through the great general strike, was made by the Rt. Hon. F. O. Roberts, who was Minister of Penitence in the MacDonald government. The speech was at the convention of the Dominion Trades and Labor Congress.

Mr. Roberts is a fraternal delegate of the British General Trades Union Congress and he dealt with the coal strike and the general strike denunciation of Premier Baldwin, the Bishop of London and Dean Inge being enlightening parts of a speech which stirred the convention deeply.

That the "crisis" never would gain North America was a statement made by James R. Connor, president of the Swiftmen's Union, who is a fraternal delegate of the American Federation of Labor.

## Ship Is Scuttled

Sea Valves on Old Man-of-War Opened by Mischievous Boys

Sydney, N.S.—The old wooden main-of-war, Pelican, once one of the smartest vessels of the British North American squadron, was sunk at her moorings here election night by two seaboys who opened her seawater valves. She now lies in 25 feet of water, and an effort will be made to raise her next spring. Citizens of Sydney are planning to purchase the old vessel.

## Have Not Definitely Rejected Conference

But Representatives of the Striking Miners Condemn Prime Minister's Proposal

London.—The entire executive committee of the British Miners' Federation met Premier Stanley Baldwin and the cabinet committee in Downing street and declared Mr. Baldwin's latest plan to end the coal strike was a complete change of front from the earlier promise to the miners made by Mr. Lloyd George.

Although condemning the Prime Minister's proposal that the miners yield on the point of national bargaining with the mine owners, the strikers' representatives did not definitely reject the compromise, but left loopholes open to allow for further negotiations with the Government.

## Build Another Plane

Sikorsky Hopes to Have Plane Ready for Trans-Atlantic Flight in Spring

Westbury, N.Y.—Igor Sikorsky, designer and builder of the ill-fated S-35, in which two Captain Pond's crew lost their lives in an attempted take-off for Paris, hopes to have another plane built by spring for a second attempt at a non-stop trans-Atlantic flight, he states.

It was learned that plans are already in preparation for the construction of a plane. Mr. Sikorsky intimated that in the next flight, he means to go along as mechanic to prove his confidence in his own work.

## Doing Excellent Work

Feeder Shows Held by Western Canada Feed Livestock Industry

Moosaj.—The Dublin correspondent of the Meat Traders' Journal, London, England, comments: "Western Canada shows the excellent work being done for the livestock industry in the Feeder Shows, which have now become an established custom at Edmonton, Calgary, Moose Jaw and Winnipeg."

The correspondent advises the Irish breeders and returns to follow the example: "As it would be an educational incentive to improve breeding all round, and enable those interested in the experiment regarding the best crosses suitable for modern requirements, and so possibly increase the demand for young cattle from Ireland."

## Plan Evacuation of Rhine

Geneva.—Germany and France are envisaging complete evacuation of the Rhine and not a mere reduction of the forces of occupation; Dr. Stresemann, the German Foreign Secretary, told newspapermen prior to his departure for Berlin.

## Many Bodies Recovered

Schriber, Fla.—One hundred and ten bodies have been recovered at Moorehaven and at least 200 more are rapidly decomposing. Col. S. L. Lowry, Jr., of Tampa, who took control of the region, told the Associated Press upon his return from Moorehaven.

## WORLD'S YOUNGEST MOUNTAIN CLIMBERS

These two children, Billy Agnew (left), age twelve, and Patsy Agnew (right), age ten, accomplished the astounding feat of climbing to the top of Mount Edith Cavell (11,033 feet), one of the highest mountains in Jasper National Park, Alberta. They were accompanied on their ascent by Henry Fuhrer, Swiss guide of Jasper Park Lodge, who is holding the young adventurers in his arms.

## Fortune Returning

Hugh Hume, Jr. Takes Long Term Contract From Former British Subjects

Berlin, Germany.—A 30-year-old old bar of Germany's war-time fortune, today is regaining the financial throne which was his by right of inheritance and from which he was ousted last year after a brief period as head of the vast combination of trusts created by his father.

Thanks to the British coal strike, which in its fifth month, the young Hume's fortune is returning. Adroitly exploiting the small properties he retained after last year's crash, Hume Jr. has developed a coal export business from which, according to his associates, he has pocketed within 900 profit. France, Scandinavia, Holland, and South America have purchased his offerings. It was estimated that his sales had increased from 2,000,000 to 2,500,000 tons as a result of the British strike, and he has obtained many long term coal contracts in former British markets thereby assuring continued profits.

## MORE SETTLED CONDITIONS AND IMPROVED TRADE

Montreal.—"Whatever the adverse influence of a political campaign upon business—and that which ended on the 11th was inconsiderable—it has ceased to be," says the monthly business summary of the Bank of Montreal.

"The Incoming Government has secured a majority sufficient for its purpose—one giving reason, its assurance of stability during its ordinary term of office, and a factor favoring continued improvement of trade."

Speaking of crop conditions the summary says:

"Gathering the harvest is the work of the moment and as a whole the harvest at a conservative estimate is well up to the average."

"Business generally remains satisfactory and the outlook presents no cause for misgivings."

## Would Regret King's Absence

London Paper Says British Liberals Should Take Tip From Canada

London.—"It will be regrettable that every point of view is seen only too probable, Mr. Macdonald King will be unable to attend the Imperial conference," says the Liberal weekly paper, Truth.

"The Liberal leaders in the Mother Land will have particular cause to regret Mr. King's absence from London," Truth adds, "for who is more fitted than he to give useful tips on the way to sweep the country?"

Continuing in a humorous vein, Truth proceeds to suggest that Macdonald King should be invited to preside over a friendly and strictly private conference at which Lord Oxford and Asquith, Lloyd George, Walter Runciman, M.P., and a few other choice spirits could confer with him freely on the best method of leading a party.

Falling this, the next best thing would be for all of them to go to Canada for a winter course of instruction.

## Advance In Ocean Freight Rates Effective

Montreal.—Effective immediately, a general advance of 15 per cent has been made in the freight rates from Canadian ports to the United Kingdom by the steamship lines represented in the Canadian trans-Atlantic conference, announcement of this having been submitted by A. O. Munhall, conference secretary on behalf of the companies concerned.

Reasons given for this rise in rates is attributed to the increasing cost of coal and to the necessity for ships having to take coal aboard in this country for the round trip, thus reducing the amount of their available cargo-carrying space.

The commodities that will be affected by this surcharge are only those included in the first deal with under the jurisdiction of the conference. Cattle, flour and grain are not affected by the new rates, as these do not come under purview of the lines as a whole.

No change has been made in the freight rates to the continent, the assumption being that ships can coal at any of the ports at which they discharge cargo outside the United Kingdom.

## Sobriety In Italy

Mussolini Encourages Restrictions on the Use of Alcohol

London.—Encouraged by Mussolini, the school authorities of Italy have forbidden the children to take bottles of wine to school with their lunches.

Ed. J. Richardson, European secretary of the World League Against Alcoholism, returning from a tour of Italy, announced:

"Mussolini is working strenuously for sobriety among the youth. Italy now has a fascist law forbidding any wine to be sold to those under 18 years of age."

"Furthermore, there is a widespread movement to educate the more ignorant classes not to give any alcoholic drinks to children in the homes."

## Offered Big Job

Premier Brownlee of Alberta Tendered Position With West Pool

Edmonton.—For the second time within a year, the office of general manager, or chief executive officer, of the Canada Co-operative Wheat Producers Ltd., made up of the three provincial wheat pools of Manitoba, Saskatchewan and Alberta, has been offered to Premier J. E. Brownlee, and the rumor is that Mr. Brownlee will resign his office as prime minister of Alberta to accept that position. Mr. Brownlee will neither confirm nor deny the rumor.

## Conscript: Negro Labor

Miami, Fla.—A drastic rehabilitation step was taken in Miami when conscription of negro labor, all negro males of workable age were sought out by police and deported and brought to the court house, and then led in gangs to the work of clearing away debris.

## Insurance Companies Hard Hit

Atlantic City, N.J.—Indemnity of approximately \$175,000,000 will probably be demanded as the result of the Florida hurricane, Cliff S. Jones, of Kansas City, Mo., president of the National Association of Insurance Agents, announced here. Jones is presiding at the annual convention of his organization.

## Ends Anti-British Boycott

Hong Kong.—The Cantonese Government foreign minister announced the end of the anti-British boycott which has been in progress for some time. The announcement says that "to what extent this step will lead to a restoration of trade relations between China and Japan must depend upon British policy."

## Secret in Photography

Seattle.—The secret in photography is to make the subject appear thin, Charles Aylett, a Toronto photographer, told the Pacific International Photographers' Association, which was in session here. "If no person shows the effect of too many calories stand her up," Aylett said. "If she is too thin, sit her down."

## Will Use Zeppelins

Frederichshafen, Germany.—Zeppelins, built at the Frederichshafen works, will be used exclusively in the new service between Berlin and Buenos Aires, a Meccas for which was granted by Spain to a German company.

## Fortune Returning

Hugh Hume, Jr. Takes Long Term Contract From Former British Subjects

Berlin, Germany.—A 30-year-old old bar of Germany's war-time fortune, today is regaining the financial throne which was his by right of inheritance and from which he was ousted last year after a brief period as head of the vast combination of trusts created by his father.

Thanks to the British coal strike, which in its fifth month, the young Hume's fortune is returning. Adroitly exploiting the small properties he retained after last year's crash, Hume Jr. has developed a coal export business from which, according to his associates, he has pocketed within 900 profit. France, Scandinavia, Holland, and South America have purchased his offerings. It was estimated that his sales had increased from 2,000,000 to 2,500,000 tons as a result of the British strike, and he has obtained many long term coal contracts in former British markets thereby assuring continued profits.

## Have Not Definitely Rejected Conference

But Representatives of the Striking Miners Condemn Prime Minister's Proposal

London.—The entire executive committee of the British Miners' Federation met Premier Stanley Baldwin and the cabinet committee in Downing street and declared Mr. Baldwin's latest plan to end the coal strike was a complete change of front from the earlier promise to the miners made by Mr. Lloyd George.

Although condemning the Prime Minister's proposal that the miners yield on the point of national bargaining with the mine owners, the strikers' representatives did not definitely reject the compromise, but left loopholes open to allow for further negotiations with the Government.

## Build Another Plane

Sikorsky Hopes to Have Plane Ready for Trans-Atlantic Flight in Spring

Westbury, N.Y.—Igor Sikorsky, designer and builder of the ill-fated S-35, in which two Captain Pond's crew lost their lives in an attempted take-off for Paris, hopes to have another plane built by spring for a second attempt at a non-stop trans-Atlantic flight, he states.

## THE NEW PARLIAMENT

Our newly elected house of commons will probably be tempted to become as vigorous as its predecessors in making laws which will seldom or never be enforced.

Will it be strong enough to resist theorists, faddists, and parish-pump politicians, and pass only such legislation as will advance the best interests of the Dominion, not of any section or class at the expense of others?

For only such laws as have a united enlightened public opinion behind them are capable of continued enforcement, or of accomplishing the end desired!

That crime had been very steadily decreasing in the British Isles, was the interesting statement made the other day by Lord Darling before members of the Canadian Bar.

In explanation of this satisfying fact the distinguished English jurist declared: "I attribute this to a strict enforcement of the law, and to the adherence of the British people to capital punishment."

It is very frequently pointed out by prominent American writers at the present time that if there were less juggling with the criminal law in the United States, and if the example of English courts were followed the number of criminals would soon show a marked decrease.

There is scarcely a country but has heard of the fame of the North West Mounted Police, of how they pursue the criminal often over vast stretches and bring him to justice. Such examples impress upon those who are far from regular courts that the strong arm of the law will surely ferret them out and make them suffer for their crimes.

The foundations of society rest not law, but upon the enforcement of law, but upon the enforcement of law.

—Family Herald and Weekly Star.

"Paw, where does ink come from?" asked Willie.

"From incubators, son. Now run out with the boys."

A very plump woman entered a local store a few days ago, and wobbling up to a clerk, announced: "I would like to see a bathing suit that would fit me."

The clerk looked at her and replied: "Madam, so would I."

Uncle: "How old are you, Willie?"

Willie: "I'm thirteen at home, fourteen at school, and eleven in the train."

A young lady was being examined by a doctor in a local hospital the other day. "What you need, my dear young lady, is a little sun and air," said the medico.

Patient: "Why, the very idea; I am not even married!"

## Real Scotch

"Mac, would you like a little of something Scotch—the real thing?"

"Well, now—I never—"

"Of course you would. Mary, bring out that pot of Dundee marmalade."

The Salvation Army territorial congress will be held in Winnipeg, October 15th to 20th. The session programme opens on the 15th with a grand pageant of youth, a mammoth, spectacular presentation of the young people's activities of the Salvation Army.

Supervisor for Alberta, L.O.O.M.

## A FRIENDLY CONVERSATION ABOUT THE LOYAL ORDER OF MOOSE

I want every man, woman and child to know about the protection that this Order gives.

Here are facts I want to put before the people that will make them ponder. After you have read them carefully, I feel sure that you will want to know more about this wonderful Order, which is out to try, and lift some of the burden of life off the shoulders of the individual.

Our health is not, or cannot be guaranteed. We fall sick or we may meet with accident at any time which may bring about our death. Have we protected ourselves against these possibilities?

Your good wife may find herself a widow and your children fatherless. Here is our heaviest liability. Are they provided for as time rolls on with training and education?

This is what the Loyal Order of Moose, comprising of 90,000 men of the white Caucasian or white race, are banded together for—to provide the most complete protection the world has ever seen, through and in the name of fraternity. It provides comfort and is our sure refuge. We know no limit in the way of fraternalism.

We take the little ones, teach them a trade, educate them, build them up in good health, morally, physically, and make them good citizens and loyal to their native land. The child city at Mooseheart is heaven upon earth for our children, and there mothers and wives of deceased brothers train them for the battles of life. There is no separation. The mother goes with her children and if she is able to work is given remunerative employment and is therefore protected for her lifetime so long as she remains a widow.

Moosehaven, the city of opportunity, provides against incapacitation and old age. Again there is no separation. Where dad goes, mother goes with him, to spend their remaining years together in peace and comfort. There are 220 couples at Moosehaven.

**Mooseheart Extension Service**  
This is a service for those families where some of the children are over the age of 14 years or are mentally or physically subnormal, making them ineligible for the children service at Mooseheart. Mooseheart, with the exception of the buildings, is brought to such families, so that even here there is no separation. At the present time we have 400 families enjoying this great service, made possible by the Loyal Order of Moose. We are keeping four families in Canada.

These facts are brought to your notice in order that we may have the pleasure of including you in our circle—that you may obtain and share these benefits which the Loyal Order of Moose gives to all its members.

You owe this protection to your loved ones. Why not join us now? The initiation fee is \$10 and dues are \$15 a year, payable quarterly, semi-annually or yearly, or \$250 down and be a life member.

The Women of Mooseheart Legion is the auxiliary of the Loyal Order

## Here and There

A civic vacation party arranged by the Kiwanis Club of Blainville, Iowa, recently passed through Toronto and Montreal on route to London, England. There were 600 who availed themselves of the trip and most of these had never travelled outside the United States before in their lives. They will pass through Stratford-on-Avon and Oxford on their way to London and will make a side-trip to Paris and the French battlefields during their stay.

"Association football in the Dominion of Canada bids fair within the next few years to become a rival to the brand of soccer played by the major leagues in Great Britain," was the comment of Joe Smith, captain of the All-England Association Football team, which last completed its seven-week tour of Canada. The team travelled close on ten thousand miles on its tour and played twenty games against all kinds of teams. They did not lose a single game and scored 105 goals in all with only 18 registered against them.

Two officials whose tenure of office was practically contemporaneous with the existence of the Canadian Pacific Railway, have recently retired from that company. They are C. J. Flanagan, auditor of freight and telegraph receipts, and J. H. Shearing, auditor of passenger receipts, both were presented with gold watches suitably engraved, while members of their staffs gave to Mr. Flanagan a travelling bag, and to Mr. Shearing a malacca cane with a gold band engraved with an expression of the esteem of his staff.

Mayor Thomas Foster, of Toronto, and Mayor Moderic Martin, of Montreal, took advantage of the newly inaugurated Canadian Pacific trains "The Rideau" and "The York" between their respective cities to exchange letters of greeting. When "The Rideau" pulled out of the station at Toronto on its initial run, the engineer carried a letter from Mayor Foster conveying his greetings to Mayor Martin, who replied the following day in the same manner, but by "The York." Both trains make the run between Toronto and Montreal in eight hours.

of Moose and is an important branch of the Order. They also provide sickness and accident benefits to their members. They are also anticipating joining here as well as at Coleman. The initiation fee is \$2.50 and dues \$7 per year. It gives the member \$5 per week for ten weeks (total disbursement) after the first week. Work you take out this protection which goes the limit, yet knows no limit—protection from the cradle to the grave.

All the paraphernalia will be here to institute lodges in Coleman and Blairmore early next week.

—A. J. INGRAM.

## New Telephone Rates are Necessary

## BECAUSE

The old rates failed to provide any reserve provision for depreciation or storm damage on an investment by the people of the Province of \$22,506,145.57.

1 The old rates barely paid for operating expenses and interest charges on the capital debt.

1 The interest charges of over a million and a quarter annually are fixed and must be paid.

1 Operating expenses have been cut \$10.08 per station in the last few years and can be cut no further without seriously impairing the service.

1 The added revenues will secure adequate protection of the investment and put the telephone utility on a sound financial basis.

1 The individual subscriber's share of the increase is small and he receives dollar for dollar for his rental in good telephone service.

1 With adequate and fair rates, Alberta's Telephone System is second to none in America. As a subscriber you appreciate this.

DR. SCOTT NEARING  
TO LECTURE HERE

Word has been received by the secretary of the local miners' union that Dr. Scott Nearing will appear at the opera house here in one of his popular lectures on the afternoon of Tuesday, October the 12th.

Dr. Nearing is looked upon as one of the greatest economists of the present day. His lectures on any of about thirty subjects are forceful and convincing.

He is just now returning from a visit to Great Britain, where he attended the I. U. Congress at Bournemouth. He is lecturing through Alberta under the auspices of the People's Forum Speakers Bureau.

His various subjects include the following:

Economics—Capital Restoration in Europe. Working and Owing for a Living. Will Hard Times Return? Economic Citizenship.

Social—Tolstol—The Meaning of Life. Socrates and the Truth Seeker.

The Labor Struggle—Some Causes of Labor Unrest. The British General Strike. Are We Ready for a Labor Party? What Ails the Farmers?

Educational—What is Labor Education? The Child's Part in Education. Educational Frontiers. Education in Soviet Russia.

Whither Europe—Rise of Capitalist Imperialism. The Crumbling British Empire. Russian Reconstruction. League of Nations or Soviet Union? Trade Union Unity.

Whither America—The U.S. as an Investing Nation. The U.S. and Her Neighbors. The U.S. and Her Rivals. The U.S. and Her Own People. The Role of American Labor.

The New Social Order—Where is Civilization Going? World Economy. The Transition to the New Social Order. The Revolt of Labor. Man Under the New Social Order.

World Economics—Food Struggle. Economic Organization. Production For Use. Sharing Income. The Changing Social Order.

Post War Economics—Wealth Concentration. The Struggle for Raw Materials. Unemployment and Hard Times. The Rise of Organized Labor. Labor Parties and the Labor State.

The subject to be dealt with here will be announced later through handbills or posters.

George Meffan, for the past year or so assistant in the local warehouse of Plunkett & Savage, leaves next week to take up duties in the Cranbrook warehouse of that firm. He will be joined there later by the family. Mr. Meffan is being replaced here by Mr. Buchanan, of Lethbridge.

### CHAPTER XIII.—Continued.

"There!" the woman on the cushions exclaimed: "You are so delightful again, as you always are when you're trapped. Now I shall sip my drink, if I may, while you proceed to your cross examination. See? I am careless of my affairs; I expect them to the same whiz-zy."

"Sitra becomes you, wonderfully," he said regarding her as with a deep sense of appreciation. "Somebody a master painter will parody the Madonna with you as his model, and give the world a new masterpiece. Your lips are set just right for him, now. Presently I shall drink a toast especially to everything that isn't Madonna-like about you, since I can do that better than you. Meanwhile, I admit to being curious. Mind you, only curious. What are you going to do with—or to—the girl?"

"Do you think an impulse of last night, born of my own thrill at the riot, that must be going on in her mind, must necessarily be so delicate as that? With some hidden motive behind it?"

He did not as once reply. His thoughts seemed to have wandered off for a moment. When he spoke again his tone had lost all veneer of banter. "I do not believe you ever surrendered to an impulse in your life," he said, his words studiously measured. "There can be no common between you and this girl who has no other masquerade than her own natural virgidity. She's more likely to be a novice than a foil. So you have a motive as clearly defined as the province you are trying to bring into your eyes."

Yvonne treated him to her silvery laugh and would have interrupted him, but he went on, calmly, "Brandon is obviously playing a game. I am convinced that he knows where his money came from and why, despite his clumsiness. And I am convinced, too, that you do not, yet you do liberally open a web for the girl and play spidee to the 49. Why?"

## THEY SUFFER NO MORE

Two Women Over Health to Lydia E. Pinkham's Vegetable Compound

St. Adolph, Manitoba. "I was very weak and had great pains during the periods so that I could not sweep the floor. The pains were in the right side and extended to the left and to the right. It seemed as if the body was heavy and upside down. It is for these troubles I took the Vegetable Compound. I saw about it in a paper and one woman had helped me in every way. The pains are less, and I have more appetite. It is a pleasure to recommend Lydia E. Pinkham's Vegetable Compound to other women."—Lila DeLoe, St. Adolph, Manitoba.

Found Great Relief Toronto, Ont.—"I am the Change of Life with hot flashes, weakness and nervousness. I had head noises and was short of breath. I was this way about six months when I read about Lydia E. Pinkham's Vegetable Compound in the newspapers. I have taken eight bottles so far and found great relief."—Mrs. R. J. Salmon, 112 Laidlaw Ave., Toronto, Ont.

W. N. U. 1648

france into the winter garden, just in time to see Teddy Dormister, the elf who was born a lord but could persuade no one to consider the coincidence seriously, come to a standstill before the slight, fish-like figure that stood directly in his path from the reception hall, where he had just turned over his coat and stick to Walker, across the room to the garden. Teddy Dormister kept none of his secrets or his enthusiasms to himself. He brought a new store of both on his daily droppings in at Yvonne's—her's, in a measure, a continuously open house when she was in town.

The newcomer stared like Joanna's face frankly. He tumbled in his pocket and produced his eye glass, which he carefully screwed into his eye. Then he scrutinized her again, utterly oblivious to her equally unashamed stare at him.

"Jove!" young Dormister exclaimed. "What a pretty girl!" Yvonne was in time to hear Joanna's reply: "How fit the world did you ever happen?"

### CHAPTER XIV.

#### Across the Threshold

Both Joanna and Lord Teddy were startled by Yvonne's peal of laughter. "Now, Teddy, you know what everybody thinks when you're around," she declared. "You must really make up an answer some time." Turning to Joanna, she informed her: "He's not always so bad-mannered, you know. I fancy you'll get along famously. I'll present him to Lord Dormister, but you must just call him Teddy—it fits him better." To the man, who struck Joanna as something of an overgrown youth, she added: "This is my new portage, one I'm going to be availed of—Miss Manners after some while you'll be calling her Joanna."

"Lord Teddy was all embarrassment and contrition. 'Oh, I say,' he tumbled, 'I thought it would be some one who—oh—you were having to sing or dance, or do something like that, you know tomorrow night perhaps? Didn't know she was a friend. 'Sorry, terribly!'"

Joanna whig had scant ideas of what one does at a meeting with a lord even a Teddy sort of one, scrambled desperately for what she would have termed, conceivably, the right comeback. She was disturbed, too, by that apology for supposing her as one who had come to sing, or to dance, or to do something like that. It implied something, she didn't know what, but something about her that was not as it should be. Yvonne shot a frown at Dormister and went to her rescue. "This along now, Teddy," she commanded. "There's tea or alcohol, whichever you prefer, in the garden. You know everybody is there. Miss Manners will remember, anyhow, that you were perfectly in earnest despite your reticence."

He wanted to add something to his apology to straighten it out, but Yvonne bustled him off unceremoniously. To Joanna she said: "He's a dear, is Teddy. He follows me round the world. He says wherever I am, some husband's wife needs consolation and it's his duty to be on hand. And he declares he's perfectly sincere about it." (To be continued)

### Moslem Laws Are Strict

New Ones Issued Carry Severe Penalty For Violators

New commandments have been issued by the Saudi ruler of the strict Wahabi sect of Moslems and now master of a big Arab kingdom which includes the holy cities of Mecca and Medina. Attendance at the prayer services on Friday—the Moslem Sabbath—is made compulsory, while violators of the temperance laws are liable to six months' imprisonment. Severe punishment is to be meted out to distillers of vendors of strong drink, a second offence being punishable by deportation. The use of tobacco is also an offence, punishable with imprisonment, and anti-religious agitators will be severely dealt with. Public security officials have been given full authority to enforce these regulations.

Customer (on Sunday morning): "Give me change for a dime, please." Druggist: "Sure and I hope you enjoy the afternoon."

A man isn't necessarily worthless because his wife happens to be worth more than he is.

MONTREAL

### Not Impressed With New York

Manhattan City.

James Dunn, writer on the London Daily Mail, who is known for his articles on the "seamy side of life" under the pen name of R. E. Corder, has concluded his visit to Chicago and New York City and sailed for London on the Cunarder Aquitania.

According to the impressions, he gave to a reporter before leaving, Mr. Dunn did not appear to have been greatly pleased with New York, especially its police courts and its noises.

"The best side of New York," Mr. Dunn said, "is the outside. The more I saw of the city the better I liked such charming retreats as Mountain Lakes and other similar places in New Jersey and the various nesting nooks of Long Island."

"New York is the only city that screams at one. London hums, Paris goes, Berlin drones, but New York just yells. O. Henry has written about the voice of the city; but it isn't a voice, it's a vice."

"Not only New York the noisiest, but it is among the worst mannersed cities. The prevailing idea seemed to be that rudeness means efficiency and politeness spells weakness. New York should take lessons from Chicago in manners. In Chicago they may murder you, but they don't grate on you."

"Nerves, just nerves. That is what New York is suffering from, and everybody is rude to everybody else because everybody's nerves are on edge. I am not surprised. Take such traffic and automobiles. Now, one seems to have a different shriek, groan, whistle or hoot, and when you get on top of these the headish, ear-splitting scream of the fire engines you have indeed a city of dreadful din."

### Cleopatra Ate Onions

Ancients Were Very Fond of Salads Such as Moderns Enjoy

British food experts who have been making a special study of the history of salads say the tomato is the single new ingredient modern times have contributed to salad making. The Pharaohs—even the beautiful Cleopatra—ate onions in large quantities in their salads, and used garlic and other high-scented ingredients. Cucumber, as cucumbers and the ancient Chinese used mustard, watercress and nasturtium leaves and flowers in mixing their elaborate salads, which often contained hard-boiled eggs. Another salad was very fond of salads, and used lettuce and radishes, much as they used in modern salad making. Sour wine, not unlike modern vinegar, was used on lettuce by the Persians four thousand years ago.

"A Power of Its Own.—Dr. Thomas' Electric Oil has a subtle power of its own. All who have used it know this and keep it by them as the most valuable liniment available. Its uses are innumerable and for many years it has been prized as the leading liniment for man and beast."

### Japan Has New Intoxicant

Man Claimed to Be Overcome Viewing Cherry Blossoms

A new intoxicant has appeared in Japan. In the precincts of a shrine at Kameloo in Japan the other day, a drunken man, on patrol discovered what he took to be a corpse. He telephoned to the village office for a coffin, which was at once sent, and the body put in. On the way to the village office, however, the corpse in the coffin revived and began to sing and dance, to the alarm of the bearers. It was later ascertained that he was a young man, aged 25, who had been made intoxicated by viewing the cherry blossoms.

### Many Visit Waterton Park

The Canadian national park at Waterton Lakes, in the southwestern part of Alberta, has had a total of 11,650 visitors to the end of July, according to official registrations in the park, which shows the increasing interest in this more recently developed Canadian national playground. A million dollar hotel is being erected.

### Long Life Records

Some Animals Attain 500 Years But Trees Reach Thousands  
Members of the vegetable kingdom easily beat those of the animal kingdom where length of life is concerned.

The life of the great forest trees may vary from 100 to 1,000 or 5,000 years. The cypress, it is said, may live for 500 years, the ivy 450, the chestnut 600, the cedar 800, the oak 1,000 to 1,500, the yew 2,500, and the hohobab tree 5,000 years.

A hundred years are attained by some of the longest-lived animals, such as the elephant, the crocodile, and the tortoise. Pike and carp have been known to live from 60 to 150 years; eagles, crows and parrots from 50 to 100 years.

A Stronohere, England, farm laborer, Thomas Parr, is credited with one of the longest lives on record. He is said to have been 152 years old at the time of his death. At 120 years he married a second time, and for many years continued to work on the farm.

### Laws For Pedestrians

Punishment For Vienna Citizens Who Violate New Rules

Under modifications in the municipal laws of Vienna, persons who talk, whistle or sing too loudly in the streets may be fined 30 cents. For repeated offences jail terms are provided.

If a person is detected reading a newspaper or book while walking along the street, thereby "impeding pedestrian traffic," he may be subjected to a similar fine.

Stopping a traffic in the middle of a roadway, a carrying of packages of undue sizes and using bad or unseemly language, are among other punishable offences.

Miller's Warm Powders prove their value. They do not cause any violent disturbances in the stomach, any pain or griping, but their work is done quietly and painlessly, so that the destruction of the worms is imperceptible. Yet they are thorough, and from the first dose there is improvement in the condition of the sufferer and a cessation of manifestations of internal trouble.

### Little Helps For This Week

Be still, and know that I am God.—Ps. xiv, 10.

Fret not, poor soul, while doubt and fear.

Disturb thy breast: The plying angels, who can see How vain thy wild regret must be.

Say trust and rest: Strive not, nor struggle; thy poor might Can never wrest.

The meekness that to serve thy will, All power is His alone; be still, And trust, and rest.

—Adeline Anne Prentiss.

Do you know what Luther said? "Suffer and be still, and tell no man thy sorrow; trust in God. His help will not fail thee." This is what Scripture calls keeping silence before God.

To talk much of one's sorrows makes one weak; but to tell one's sorrows to Him who heareth in secret, makes one strong and calm.—Thouless.

### Minard's Liniment relieves stiffness

British Columbia Sheep For Russia

Forty-six pure-bred Hampshire sheep purchased in British Columbia for the Russian Soviet Government left Victoria recently for Vladivostok. This is the second shipment to go forward from the Dominion to that market, the first having been made last year.

Wealth may be a great care, but a girl naturally expects great care when she marries.

### The Old-Fashioned Grandmother

London Newspaper Finds There Is No Such Person Now

A one-day search by a London newspaper for the old-fashioned grandmother who is usually pictured as sitting quietly darning socks by the fireside, has failed completely. The inquirer compiled a list of seven grandmothers, and then set out to find out what they were doing.

No. 1 was in Paris buying frocks.

No. 2 had recently acquired a two-seater automobile and had driven up into the Midlands to see her son's house.

No. 3 had gone into the country to make a political speech in her son's constituency.

No. 4 had gone to a matinee.

No. 5 was out buying some new valves for the radio set.

No. 6 was out getting her hair shingled.

No. 7 had gone to a tea dance at a big hotel.

### KEEP CHILDREN WELL

#### DURING HOT WEATHER

Every mother knows how fatal the hot summer months are to small children. Cholera infantum, diarrhoea, dysentery, cold and stomach troubles are life at this time and often a precious little life is lost after only a few hours illness. The mother who keeps Baby's Own Tablets in the house feels safe. The occasional use of the Tablets prevent stomach and bowel troubles, or if trouble comes suddenly—at it generally does—the Tablets will bring the baby safely through. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

A statue of a horse, in memory of the horses killed in action during the war, is to be placed in the church of St. Judeen-the-Hill, Hampstead Garden Suburb, London, N.W.

Proved safe by millions and prescribed by physicians for

## Spade Work That Gets The Trade

To get steady sales in satisfactory volume, you must build up confidence in your store and its service.

Advertising in "The Enterprise" will lay the foundation of such confidence. Advertising does the spade work that leads to bigger sales. It will tell folks about your store, its service. It will tell them about the goods you have to offer.

Let your advertising in "The Enterprise" be a standing invitation to the folks around here. As a rule,

## PROGRESSIVE MERCHANTS ADVERTISE

Issued by Canadian Weekly Newspapers Association

"That's a good one on me," said the bee, as the minister sat down on him.

Old Salt (to fair visitor at Bray, who has been out with him in his boat): "Bit of a swell today, Miss."

Visitor: "Awful nice of you to say so; but you ought to see me on Sundays!"

Young man: "So Miss Ethel is your oldest sister? Who comes after her?"

Small boy: "Nobody ain't come yet, but Pa says the first fellow that comes can have her."

A man went into Steeves' drug store the other day and asked: "Have you a copy of 'Who's Who and What's What,' by J. K. Jerome?"

"No, sir," replied Steeves, "but we have 'Who's He and What's He Got,' by Bradstreet."

Even a sense of humor may exist in excess. There is a case of a soldier who was sentenced to be flogged. The harder the lash was laid on, the harder the soldier laughed.

"Wot's so funny about being flogged?"

"Why," the soldier chuckled, "I'm the wrong man."

A preacher was delivering a discourse on prohibition and in closing his remarks said, "I wish all the liquor in the country might be poured into the river. Then he said, 'Let us sing Hymn No. 184.' The congregation turned to the desired page and a hushed ripple of laughter spread through the church. The minister was bewildered at first, but a slow, good-natured smile spread over his face when he realized that the hymn he had selected was entitled, 'Shall We Gather at the River?'"

Grandpa (severely): "Little girls should listen and not talk."

At the end of the dinner Grandpa, in a gentler mood, calls the child and asks:

"What was it you wanted, dear?"

"Too late, Grandpa; there was a fly in the salad, and you ate it."

"It's three years since I was in this town," said a visitor at the Tea Kettle Inn, as he finished his dinner. "I don't find much alteration."

"I don't find much change either," said the waitress, as she picked up the penny that was left under the plate.

If parents want a free and interesting entertainment some time, they should watch their boys in hiding, practicing the use of cigarettes.

Mary had a bathing suit, The latest style, no doubt; And when she got inside the thing She still was half way out.

The trouble with the farmers is that they have, got the same itching as the city man for bigger profits and less work.—Toronto Telegram.

## AN HISTORICAL SITE

- 1—The historical site as it was at the corner of St. James and St. Peter Streets. Montreal's old Mechanics' Institute building is seen in the foreground.
- 2—The cornerstones of the Mechanics' Institute building in 1864 showing the glass bottle, which contained many interesting relics.
- 3—The curved design on the old Bank of Montreal Building, the two curbstones and the design of ruins indicating the place for which the land once changed hands.
- 4—The old site being cleared to make way for the new mammoth structure.

LESS than 300 years ago, the early French settlers could watch within the walls of the fortified trading post of Montreal and watch the land being tilled on a site which is now the corner of St. James and St. Peter Streets, in the heart of the financial district of the metropolis of Canada.

Old records show that the present site formed part of the first concession to be granted upon the Island of Montreal by the Governor, Paul Chomedey de Maisonneuve, to Pierre Gaultier, who is described as the first "habitant."

To-day, that same land, being dug, only the ox plough and the humble spade, have given place to the steam shovel. In the next few months the steel skeleton of the tallest building in the Dominion and the Empire will rear its head above the surrounding buildings. Passers-by will crane their necks to watch the riveters at work on the twenty-first story, and any one of them will tell you that the building, when finished, is to be the new home of The Royal Bank of Canada.

The site, which is granted to be one of the most historical in the city, occupies an entire city block facing on four streets—St. James, St. Peter, Notre-Dame and Dollard Lane. Its history dates back to the founding of Montreal and its soil is steeped in romance.

After the death of Gaultier, the first owner of the land, it was divided among his heirs and passed into the possession of various holders. In 1669, Andre Rupin, a French military surgeon, established a home on the farm site. In 1676, a gunpowder magazine was built on a corner of the present site. In 1748, one Etienne Robert de la Normandie, keeper of His Majesty's stores, has his residence on the site. Later it became a burial ground, and, in the middle of the nineteenth century, the north-east corner was acquired by a body of citizens, who erected thereon the Mechanics' Institute, the cornerstone of which was laid in 1838.

The land and building cost approximately \$25,000, and, in 1911, it was sold for \$400,000. It was in the corner hall in this building, in the year 1856, that the celebrated Canadian singer, Madame Albani, made her debut.

The cornerstone of the Old Mechanics' Institute building was discovered by workmen on August 6th. In a hole in the stone beneath a brass plate was found a glass bottle containing old newspapers, coins and other documents of interest. The stone and its contents were presented by the Bank to the Directors of the present-day Mechanics' Institute.

On the west end of the site stood the old Bank of Montreal building, and at the head of one of the columns on the front of the building was a stone bearing the carved design of two cartwheels embracing a flag. History has it that this design recorded the fact that during the first years of the English regime in Montreal, the plot of land on which the old bank building stood was sold by its proprietor, a blacksmith, for two cartwheels and a flagon of rum.

It is a long cry from the pastoral solitude of Pierre Gaultier and his ox plough to the twenty-story bulk building occupying the same site—but such is the march of progress, which give The Royal Bank of Canada's largest and finest bank building the North-American Continent!

## Liner and Planes in 3000-mile Dash to Effect "Scoop"

Gertrude Ederle's recent victory over the English Channel, wrote an epic into the already brilliant aquatic records of America. And while this youthful swimmer, who broke all existing records in her Channel swim, was being lauded in Europe for her victory, a sequel to this event was taking place in America which will go down on the romantic pages of journalism as one of the biggest "scoops" in newspaper enterprises.

Using a four-plane relay, in co-operation with the Canadian Pacific steamer the Empress of Scotland, representatives of the New York News, landed the actual photographs of the great Channel swim in their offices in New York fully twenty-four hours before other prints could possibly arrive.

As the gangplank of the Empress of Scotland was being raised at Southampton, a messenger dashed up to the ship and placed a bundle of prints in the care of a messenger. Even the Commander of the ship was ignorant of their value until a radio message flashed in giving the instructions for the disposal of the prints. A seaplane would pick them up near Anticosti Island. True to the arrangements the seaplane was on the scene, and Commander Latia gave instructions to an officer to wrap the photographs in a waterproof cloth and lower them over the side of the ship. The seaplane circled the ship and alighted. In a few minutes the package was picked up but the sea had become so choppy that it took the plane several hours to taxi to the lee of the island before it could rise. Finally taking to flight it flew straight to Rimouski where the prints were divided and placed on board two waiting land planes. These two planes hopped off for New York and were hopeful of reaching New York for the Saturday edition of the News, but heavy fogs descended and killed all hopes. One of the planes was forced down at St. Eloi and success was up to the other plane. After flying in the fog almost to Montreal, it turned south and landed at Plattsburg and met another plane at the parade grounds there. Here the other plane took the pictures and began the last leg of the perilous flight to New York. Flying at 112 miles an hour through three electric storms and one of the heaviest fogs ever encountered by the flyers the plane landed at the West Side Park, Jersey City. A little over three hours after the final dash was begun the pictures were delivered at the office of the News in New York 24 hours ahead of pictures en route via New York.

# RED ROSE "is good COFFEE"

## Farmers Suffer Enormous Loss

According to a bulletin recently issued by the Saskatchewan Department of Agriculture, weeds will cost the farmers of the Province more than thirty million dollars this year, in the decreased yield due to weeds, in the increased cost of harvesting and threshing their grain, in dockage and freight on weeds shipped with the grain to Fort William or Vancouver.

This year when conditions have been so favorable for the growth of grain, they have been equally favorable for the growth of weeds, and sections of Saskatchewan have many square miles of crops grown on some of the richest soil in the Province which have been so yellow with malignant that hardly a blade of wheat could be seen. Wild oats have been worse than ever this year, cow thistle is steadily widening the area where it is a thorn in the side of the farmer, and atank weed is flourishing like the proverbial green bay tree.

If to a thirty-million dollar loss for Saskatchewan alone, the losses for Manitoba and Alberta are added, the total loss for the three Prairie Provinces will be between fifty and sixty million at least, easily constituting the heaviest charge levied on Western agriculture. Half losses have been heavier than usual this year, but they do not begin to approach the losses sustained by farmers through weeds.

For a quarter of a century or more, Western farmers have been waging a battle for lower freight rates. They have won notable victories in this regard, not the least of which was the obtaining in the first instance of the Crow's Nest Pass rate on grain and their restoration after they had been abrogated during the war. But the estimated savings to the farmers of the three Prairie Provinces through the Crow's Nest Pass Agreement, running as they do into millions of dollars annually, do not equal the losses sustained by the farmers of Saskatchewan alone through weeds.

A reduction in the Customs tariff on agricultural implements and machinery, or on any one of the many articles necessary to the farmer, is hailed with pleasure as a real relief to the agricultural producer. The practical wiping out of the Income Tax so far as farmers are concerned, the reduction of the postage rate from three cents to two, and other legislative enactments reducing the burden of taxation, are rightly regarded as important in assisting to make farming and all industry more profitable. But these savings are small in comparison to the millions of dollars that would be left in the pockets of Western farmers through a vigorous, persistent, successful fight all along the line against noxious weeds.

The whole country gets stirred up in an election campaign where tax reduction policies are an issue. Farmers unite and organize to place candidates in the field pledged to taxing reductions, reduced freight rates, Rural Credits, and other measures calculated to advance their interests and prosperity. But all too many who wage battle for these lesser gains appear quite indifferent to the weed menace and its resultant heavy losses to themselves and the country at large. Many farmers who are enthusiastic, and organize and fight for those things which they can only obtain in co-operation with the other Provinces of Canada, yet display the most astounding apathy in dealing with a problem which is all their own, and the solution of which rests solely with themselves, working in co-operation with their next door neighbors.

The Saskatchewan Weed Bulletin just issued contains valuable information and guidance for farmers in dealing with their weed problem. It is written in clearly understandable, non-technical language, and every Saskatchewan farmer who has a weed problem on his hands should send to the Department of Agriculture, Regina, for a copy of this Bulletin, which is available in Manitoba and Alberta should likewise communicate with their Provincial Departments of Agriculture for similar literature.

The Saskatchewan Bulletin states that the greatest source of the weed trouble is found in dirty seed, and it has been proven that quite a large number of farmers who cultivate their soil carefully to destroy weed seeds already existing in the ground, are actually retaining the same plant criminals to the soil through weed seeds contained in their seed grain, thus perpetuating all their toil and labor for naught, perpetuating the problem, and keeping up the loss.

Co-operation among Western farmers is accomplishing great things for them and for Canada, and co-operation is capable of achieving even greater things in the years to come. Possibly in no way can more be accomplished than by each individual farmer cultivating in the war on weeds, and waging it aggressively in season and out on his own land, and in co-operation with his neighbors and municipal officials throughout the whole district in which he resides.

Unlike other wars, which always end in losses for both victor and vanquished, a successful war on weeds means great gains and larger profits throughout the years to come. Let's fight!

### His Lucky Number

Friday, the 12th, holds no terrors for Frances Fisher, Springfield, Ohio, boy who celebrated his 13th birthday, Friday, August 13. He was born at 4:13 a.m. Friday, August 13, 1925, and among other distinctions wears a number 13 shirt, a number 12 collar, and is one of 13 grandchildren. He has a reputation for being "lucky."

Better Effects From U. S. Settlers' effects to the value of \$6,000,000 were brought into Canada from the United States during the 12 months ended June 30, 1925, compared with \$6,000,000 for the previous 12 months.

### War Graves in Canada

An order-in-council has been passed extending for a further period of three years the authority under which headstones are erected on graves in Canada of members of the royal and military forces whose deaths are attributable to the war. Such authority would have expired the end of the present month, but the order-in-council will continue it until Aug. 31, 1929.

There are crevices and caverns in Yellowstone Park that give off gases fatal to birds and small animals.

It's easy to talk philosophically if the other fellow is paying the freight.

## CHILDREN CRY FOR

**Fletcher's  
CASTORIA**

MOTHER—Fletcher's Castoria is a pleasant, harmless Substitute for Castor Oil, Paregoric, Teething Drops and Soothing Syrups, especially prepared for Infants in arms and Children all ages.

To avoid imitations, always look for the signature of *Dr. J. C. Fletcher*. Proven directions on each package. Physicians everywhere recommend it.

### Scale For Weighing Signatures

Makes Calculation Within Hundredth Part of a Grain

Among the articles shown at the exhibition of the Incorporated Society of Inspectors of Weights and Measures at the Central Hall, Westminster, England, is a pair of scales capable of weighing a person's signature. The method adopted is simple, the paper being weighed before and after the writing of the signature.

The difference involves a calculation within a hundredth part of a grain. Sometimes the weight of the writing is so infinitesimal that it has to be calculated by means of a mirror and shadowgraph.

There is no average weight for a signature, but in the main everything depends upon the quality of the paper used or the degree of softness of the pen.

Another factor is the temper of the writer, for a man in a temper writes more heavily than a man in a state of mildness.

### Wheezy Chest Colds Subdued Over Night

Trained Nurse Tells How Colds Are Quickly Broken Up

## NERVINE

A Home Necessity

Speaking of valuable home remedies that every mother should always keep on hand, Nurse Carrington says: "I haven't met any preparation more reliable than 'Nervine.' It is the ideal remedy; every drop rubs in is absorbed quickly, eases and relieves congestion in a short time. For chest colds, pain in the side, stiff neck, earache and toothache, I have found Nervine invaluable. In fact, for all minor ills that arise in every home, nothing is more efficient than Nervine."

For nearly fifty years Nervine has been a household article in thousands of Canadian homes. Get a 50c. bottle today.

### Huge Laundry At Southampton

Where Washing Is Done For Three Ocean Liners

Three and a half million pieces of linen pass through the White Star laundry at Southampton every year, where the washing is done for the Majestic, the Olympic and the Homeric. Repairs necessary are carried out in the sewing room by means of electrically-driven sewing and darning machines. The laundry employs about a hundred thousand jobs per annum.

### THE GROWING GIRL

Requires a Mother's Constant Care and Watchfulness

In these early teens it is quite common for girls to outgrow their strength, and mothers should carefully watch the health of their daughters at this time for it is when strength is sapped by too rapid growth that anaemia develops. The first signs may be noticed by nervousness, languor and headaches. The face grows pale, breathlessness and palpitation follow, with low spirits.

At the first symptom of anaemia mothers should act at once. Neglected anaemia often leads to decline, but if you see that your daughter's blood is enriched there need be no cause for anxiety. The first blood enricher ever discovered is Dr. Williams' Pink Pills. The pills are red blood created by these pills will quickly banish all signs of anaemia. They will build up your girl's health and ensure her a robust, cheerful life. Give your daughter a course of Dr. Williams' Pink Pills now. Mother her strong like thousands of girls and women throughout Canada who have been rescued from the clutches of anaemia by Dr. Williams' Pink Pills.

You can get these pills through any dealer in medicine, or by mail at 30 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

### England's Oldest Living Barrister

Sir Harry Poland Has Celebrated Ninety-seventh Birthday

Sir Harry Poland, England's oldest living barrister, has celebrated his 97th birthday. He received many congratulatory messages, but was too unwell to be seen by any but a few friends.

It is 75 years since Sir Harry was admitted as a member of the Inner Temple, being called a few months after the late Lord Halsbury, who died at the age of 92.

Sir Harry became famous largely for his conduct as crown prosecutor of many notorious murderers. He became known as "the sleuth-hound of the treasury," being a great authority on the licensing laws and the incident of taxation.

Sir Harry remembers the funeral of the Duke of Wellington, and the hoisting of the Nelson statue to the top of the column in Trafalgar Square.

The man who tells gruesome stories usually manages to finish them in spite of interruptions.

Rub your scalp with Minard's Liniment

## COULD NOT SLEEP OR REST

Eczema Formed Watery Pimples, Face Disfigured, Cuticura Healed.

"Eczema broke out on my scalp and chin. It started with small itching bumps and later formed small, watery pimples that turned to sore eruptions. I could not sleep or rest on account of the irritation, and my face was disfigured."

"I read an advertisement for Cuticura Soap and Ointment and sent for a free sample. After using it I got relief so purchased a cake of Cuticura Soap and a box of Cuticura Ointment, which healed me." (Signed) Miss Muriel Jewers, Harrington Cove, Nova Scotia.

Keep your skin clear and your pores active by daily use of Cuticura Soap. Free, Irritations and Eruptions of the Skin. Cuticura Ointment. Each Cake Free by Mail. Address: The Cuticura Dispensary, 151, Broadway, New York, N.Y. Send for Free Sample.

Cuticura Shaving Stick 25c.

### The Fine Art Of Carving

Lucky is the Man Who Has Mastered All Its Details

Carving is said to be an art that takes a man a lifetime to master. However that may be, there are good and bad carvers, and one is never so expert but that he may learn some new trick in carving a rosette or fowl. There has recently been published a valuable and most entertaining little booklet, entitled "The Fine Art of Carving," which deals with this subject.

In addition to giving details regarding the proper methods to be used in carving rosetts, joints, fish and fowl, there are also valuable hints for the housewife on how to properly prepare a roast of most of any kind. The booklet is well illustrated in color showing how to select the best joints of meat, and how to carve. There is also good advice on how to reduce your meat bill, and how to roast meat without loss from shrinkage, and a great deal of other valuable information. Copies of this booklet may be obtained free of charge by any Canadian householder. Our readers would be well advised to write to the Sheet Metal Products Co. of Canada, Limited, Toronto, or to branch offices at Winnipeg, Calgary, Edmonton or Vancouver, and obtain this valuable booklet, "The Fine Art of Carving," which will be mailed absolutely free of charge.

Minard's Liniment for bruises

### World's Poultry Congress

Lord Willington Will Be the Chief Patron of the Gathering

The governor-general, Lord Willington, has expressed to the president of the World's Poultry Congress, Mr. Edward Brown, his very keen interest in the congress. Assuming office Lord Willington will become chief patron to the congress, and will welcome the international delegates when they assemble at Ottawa, July 27, 1927.

Canada's part in the World's Poultry Congress exhibition is an important one. It will comprise a national educational exhibit depicting our national poultry policy; a national live bird exhibit; provincial exhibits and commercial exhibits. The staging of these will be in the hands of the Canadian exhibition commissioner.

New buildings now in course of construction on the grounds of the Canadian Exhibition, will be available for the congress. This will be the largest exhibition ever staged devoted entirely to one phase of livestock, the whole requiring nearly 200,000 square feet of floor space.

### Internally and Externally It is Good

The crowning property of Dr. Thomas' Electric Oil is that it can be used internally for many complaints as well as externally. For sore throat, croup, whooping cough, pain in the chest, colic, and many kindred ailments it has qualities that are unsurpassed. A bottle of it costs little and there is no loss in having it at hand.

Employer: Sam, I hear you and George almost had a fight.

Sam: Yassab, boss, we all would 'a' had a terrible fracas, only they wasn't nobody there to hold us apart.

### Few Blondes Shown

Portraits of women shown in the annual exposition of the London Royal Academy works prove at least one thing—that all gentlemen do not prefer blondes. There are few blondes in the group and few red heads. Most of the heads shown in the gallery are black.

No one in France is permitted by law to earn more than \$20,000 a year, as an unforeseen consequence of the recent tax bill voted by the government.

Minard's Liniment for toothache

### Stabilization of Rural Land Values

By C. W. Peterson

No public issue has been the victim of more platitudes than that of immigration on platform and in press. In Canada there seems to be no intelligent public opinion on the question, and our economic groups are consequently of our extreme vagrant spaces. Added population merely spells further unemployment on the labor group, and increased competition to the farmer. Hence, we frequently find our great rural organizations unfriendly and even officially antagonistic towards any effort to augment Canada's population.

### Public Apathy

An intelligent study of the population question leaves one in no doubt, that lasting agricultural prosperity is not possible without the steady, progressive colonization and development of our extreme vagrant spaces by real agricultural settlers. The realization of such a programme would, however, involve a constructive and forward-looking colonization effort of a magnitude no government could so completely undertake today. View of the apathetic state of average Canadian public opinion on the subject. The superlative confronting Canada at this moment, therefore, would appear to be to convince her own citizens of the wisdom of regarding the population question as the corner stone of all public policies, which, indeed, it is.

### Agricultural Unrest

We have for almost a decade been confronted with the demoralizing spectacle of steadily increasing rural land values all through Canada. This was the outcome of a combination of circumstances, but has been chiefly due to the cessation of immigration, coupled with the modern spectacular drift to the cities. Land values today, east and west, are at very low ebb, and many farmers have thus seen their chief asset shrink to an extent that substantial equities have in some instances totally disappeared, representing the loss of the fruits of years of hard labor, on the part of every member of the family.

### The Agricultural Credit Structure

Land represents the principal borrowing asset of the farmer. Stable land values lie at the foundation of rural credit in practically all its forms. When land values become demoralized the whole agricultural credit structure is undermined. Credit of all sorts is curtailed and interest rates advanced. In fact, it may be laid down as an economic axiom, that a prosperous agriculture and a contented rural population are not within the possibilities with receding and unstable land values. The demoralizing effect in itself upon the farmer of the progressive shrinkage of his chief capital asset is bound to exercise a most unfortunate influence upon his state of mind and actions.

### Restoring Agricultural Confidence

There is today a vast area of vacant land on the market in the prairie region of Canada and improved farms are offered for sale in other provinces, comparatively at bargain prices. The demand for such properties slackened perceptibly with the drying up of the stimulating force of immigration some years ago. The settlement of the province of Ontario dates back as far as that of the Middle West of the United States. Yet land values in Iowa, Illinois and elsewhere are twice and three times as great as in Eastern Canada. Why? The Canadian farmer should be keenly interested in regaining a normal market for rural properties. A comparatively limited demand for land would, quickly be reflected in strengthened values all round and the moral effect would be electrical. Urban business would automatically benefit through such a restoration of agricultural confidence. Our farmers have, therefore, a vital interest in the inauguration of vigorous and comprehensive policies by the various governments and railways designed to promote the actual colonization of vacant agricultural areas.

### Nearly all children are subject to worms, and many are born with them.

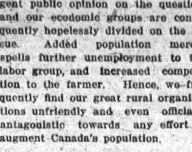

Portraits of women shown in the annual exposition of the London Royal Academy works prove at least one thing—that all gentlemen do not prefer blondes. There are few blondes in the group and few red heads. Most of the heads shown in the gallery are black.

No one in France is permitted by law to earn more than \$20,000 a year, as an unforeseen consequence of the recent tax bill voted by the government.

## Pears Most Popular Fruit

Statistics Show People Prefer Them to Apples or Peaches

It may surprise many to learn that pears are the most popular of the fruits put up by Canadian canning companies, according to the Natural Resources Intelligence Service of the Department of the Interior. Latest statistics show that over twice as many cases of pears (300,000) are marketed as compared to apples (135,000) and over three times as many as compared to peaches (85,000). Plums and cherries come next in popular favor with 60,000 and 50,000 cases respectively.

## Here and There

More than 800,000 people will have visited St. Anne de Beaupre this year when the season ends. It is already an increase over last year when 524,323 persons visited this famous shrine. During the week ending August 22nd, 45,000 pilgrims visited St. Anne.

Halifax—Considerable quantities of swordfish are being shipped from Nova Scotia to the Boston market at the present time. This commodity has found a good market in Boston and shipments to that city average around ten to fifteen thousand pounds a day during the shipping season.

Whaling operations off the coast of British Columbia this year have been very successful. Up to the end of July the fleet had caught 182 whales. There are only six steamers operating this year, while last year the number was eight. The weather has been good to date and very little fog has been encountered.

Fire chiefs representing the stations in Montreal and various near-by centres left over the Canadian Pacific lines about twenty strong for Windsor recently to attend the annual convention of the Dominion Association of Fire Chiefs, which was held August 24th to 27th. The Association is made up of over 250 chiefs from all parts of the Dominion.

Nearly 2,000 racing pigeons, owned by pigeon racing devotees in Montreal, were shipped through the Canadian Pacific Express yards at Montreal recently to various points in Quebec and Ontario where they were released by the agents at the points to which they were shipped to fly back to their home roosts in Montreal. Practice races of this nature have been carried on through the summer months.

Thomas Meighan arrived in Winnipeg recently from Chicago prior to beginning work on his next picture, "The Cohedrian". The wheat fields of the Canadian West will be the background for this picture. The location men and other members of the troupe passed through Montreal earlier on their way to the west where they were joined by Thomas Meighan, and they are looking over the Calgary district for a suitable location.

Announcement was made at the headquarters of the Canadian Pacific Railway at Toronto recently that, effective September 1st, Robert Niven, theatrical and special business clerk in the passenger department of the Company at Montreal, has been appointed assistant district passenger agent at Toronto. Mr. Niven is well known to the theatrical fraternity passing through Montreal with whom he came in contact in his business.

"I am convinced that Canada offers unlimited possibilities to immigrants from the Old Country," said the Marquis of Salisbury, Chairman of the Empire's Parliamentary Association and leader of the Conservatives in the British House of Lords, when interviewed at Vancouver recently.

His Lordship sailed recently from Vancouver to Australia to attend the Empire Parliamentary Association Conference in that Dominion this fall.

The first automatic or "remote" control power plant on the North American continent is to be built at the Slave Lake side of the tunnel connecting that body of water with Alouette Lake. The contract has been let by the British Columbia Electric Railway to a Vancouver construction company at a price of \$600,000. The total cost of constructing a dam across the Alouette River, building a tunnel connecting the lake with Slave Lake and erecting a new power house will be approximately \$2,500,000.

Over 50,000 railway cars which if placed end to end would stretch more than 400 miles are now available on the western lines of the Canadian Pacific Railway to handle the fall traffic in grain and live stock. The combined capacity of the 41,318 box cars for the grain crop which will be transported to the head of the lakes, is 570,040 tons. These are capable of carrying 60,330,000 bushels of grain each year. Estimating that the cars make five trips between the grain fields and the head of the lakes or Vancouver the Canadian Pacific Railway Company is in a position to handle more than 300,000,000 bushels during the four months of the grain rush.

## THE PASS FIFTEEN YEARS AGO

(From The Enterprise, 1911)  
Sept. 26.—Inspector P. C. H. Primrose, of the R.N.W.M.P. Police, spent Saturday and Sunday in town.

Judge Crawford, of Maricopa, conducted district court here on Thursday last.

W. M. Campbell came up from Macleod on Saturday last and returned home Sunday evening.

C. F. Harris came up from Macleod on Friday last, and addressed the electors on the benefits of reciprocity.

Frank is booming these days, if it is to judge by the building activity. Quite a number of neat cottages have just been completed and many more are under construction.

The Bellevue school is now running full blast. Mr. Kelly, the teacher, reports an attendance of 75, mostly juniors. The need of larger accommodation is keenly felt and a new building will shortly be built.

The Blairmore branch of the Crows' Nest Pass Hardware has moved into their main store at Frank. Mr. L. Dutil, proprietor of the Blairmore Hardware Co., has taken over that part of the Frayer & Sinclair building formerly occupied by the C. N. P. Hardware Co., and moved from Mar On's premises.

A very quiet wedding was solemnized at the Methodist parsonage, Bellevue, on the night of September the 7th, when Joseph Henderson Robertson was united in marriage to Miss Nellie Alexander Laurie, of Edinburgh, Scotland. Rev. W. H. Irwin officiated, while Clem Stubbs acted as best man and Miss A. Stubbs as bridesmaid. All the boys of town join in congratulating Joe and in wishing him many years of uninterrupted happiness.

Blairmore became victors in a series of tennis games played in their courts on Saturday afternoon. The games played were as follows: Men's doubles, won by J. H. Farmer and R. W. Coulthard, of Blairmore; ladies' doubles, won by Mesdames J. H. Farmer and J. R. Smith, of Blairmore; men's singles, won by J. A. McLeod, of Frank; ladies' singles, won by Miss D. Westwood, of Coleman; mixed doubles, won by Mrs. Coulthard and Rev. A. S. Todd. H. G. Bigelow acted as umpire.

Bill says: "Some people are good and get paid for it, while others are good for nothing."

Miss Enid B. Cole was accorded a good reception at the Orpheum theatre on Friday night last. Miss Cole is a graduate of the Bush Conservatory, Chicago, and is a dramatic artist of the first order. She was ably assisted by the Serenaders' orchestra and two of her little pupils.

It is claimed that Louis Auger, of Hawkesbury, Ontario, who was elected to parliament for the constituency of Prescott, will be the youngest member of the new house. He is in his 24th year and was a professor in Ottawa university before he severed connections with that institution to enter politics.

## COWLEY BARRISTERS

Mrs. Grant Smith and son Eddie have returned after spending several weeks in Winnipeg.

Mrs. Swart and Mrs. Hunsdon are visitors to Lethbridge.

Mrs. Harry Hannan has returned from a business visit to Calgary.

Mrs. Perry has gone to her home in Nebraska for an extended visit.

After spending the summer at Edmonton, Mrs. Lionel Reel is paying a visit to her parents, Mr. and Mrs. M. A. Murphy, at present.

The social evening given under the auspices of the Ladies' Aid at the home of Mrs. Annie Swart on Friday night was highly successful. In spite of the inclement weather, a good crowd turned out. A pleasant time is reported.

We are enjoying a few warm days now. The recent snow is fast disappearing, while the roads are in bad condition, owing to so much mud. Threshing and cutting are still held up and will be for a few days yet, even if the weather continues fine.

In spite of the extreme bad weather conditions, the whist drive given by the Women's Institute on Wednesday night proved to be successful. The prizes were won by: Ladies' first, Mrs. Fred Tustian (a piece of hand-painted china); ladies' second, Mrs. P. McEwen (a Dutch silver vase); gents' first, Hughie McMillan (pair silk socks); gents' second, Dick Alexander (leather belt). The boobies were awarded to Mrs. Harry Hannan and Bill Jones, being a package of post toasters and a collar button, respectively. After an appetizing luncheon, which was served by the members of the institute, dancing was indulged in at a lively pace for a while. Music was furnished by Miss Martha Tustian. A good time is reported.

## THE BARBER'S FORD

Last spring, Hartley Upham bought a car, which he christened with the above name. Hartley has had lots of pleasure out of his purchase, but he has also a lively recollection of his many troubles. To describe these, he has found a paraphrase of a well-known psalm, which is entitled "The Twenty-Third Psalm," and which is as follows:

The Ford is my auto; I shall not want. It maketh me lie down in muddy roads; it leadeth me into trouble. It draweth on my purse; I go in to paths of debt for its sake. Yea, though I understand my Ford perfectly, I fear much evil lest the radius rods of the axle might break. It has a blowout in the presence of mine enemies. I anoint the tire with a patch, the radiator boileth over. It runneth in the river and grunts for many days after. Surely this thing will not follow me all the days of my life, or I shall dwell in the house of poverty forever.

Moral: Equip your Ford with a cuckoo clock. When the car reaches a speed of twenty miles an hour the bird will come out and sing "Nearer, My God, to Thee," and at forty miles an hour, "Lord, I'm Coming Home."

AGE AND AN OAK CASE ARE VITAL TO THE PRODUCTION OF A FINE WHISKY

# Imperial Whisky

IS MATURED IN OAK CASES. ITS AGE IS GUARANTEED BY A GOVERNMENT STAMP

This advertisement not inserted by the Alberta Liquor Control Board or the Government of the Province of Alberta.

EANS PAY \$1,895,723

PHILADELPHIA, Pa., Sept. 24.—The receipts from the Dempsey-Tunney championship bout last night were announced today at \$1,895,723. The total attendance was 125,732. It was also announced that Dempsey's end of the receipts would amount to approximately \$700,000, and Tunney's to about \$200,000.

It was estimated the promoters would have a profit of about \$500,000. The total paid admissions were 118,736. In addition there were 1966 complimentary tickets issued and 5000 tickets for employees.

Coleman Pythian Sisters will hold their annual ball in the Coleman opera house on Friday, October the 22nd. Instead of the usual masquerade, it will take the form of a novelty ball. A first-class orchestra will be in attendance and the hall will be suitably decorated. Preparations are being made for a record crowd.

T. Dawson and family left this week for Calgary, where they will in future reside.

N. E. Suddaby, of Fernie, is enjoying his annual goose hunt in the central part of Alberta. Already storage room is being arranged in the various towns of The Pass and large motor trucks are awaiting at the stations to convey his trophies away.

WORLD HAPPENINGS  
BRIEFLY TOLD

Permission is to be granted American army aviators to fly over Brazil, and territory during their forthcoming visit to South America.

A decree issued by the Emperor of Brazil prohibits the importation of potatoes from any country, because of war's disease.

The British navy is developing an "aerial dreadnought" which will be used in manoeuvres with the fleet. Work on the new war machine is being conducted secretly.

The Canton Government continues lifting the anti-British boycott which has demoralized trade between Chinese and British concerns for more than a year.

A private firm is negotiating with the British authorities for the purchase near Rosyth dockyard of a site on which to erect a glass factory where 1,000 men would be employed.

The British treasury announces the French government has paid 2,000,000 pounds (about \$10,000,000), its first payment on the war debt. The Italian government also paid \$10,000,000 to the British government.

The South American Education Advisory board is considering the advisability of establishing classes for the study of Esperanto in the state schools. Esperanto is the proposed international language.

Viscount Willington, named to succeed Lord Byng as governor-general of Canada, has been made a Knight of the Order of Saint Michael and Saint George by order of His Majesty King George.

The engagement of Crown Prince Leopold, 24-year-old Belgian heir-apparent, to Princess Astrid of Sweden, 20, third daughter of the Duke of Västergötland, and niece of King Gustav, was officially announced.

The outlook for improvement in the industrial field is much brighter than at any other period since 1924," declares the report of the executive committee of the Dominion Trades and Labor Congress, meeting at Montreal.

Steps will be taken by the National Association of Canadian Clubs to ask the Dominion Government to appoint a committee, representative of the Dominion, to organize the celebration of the diamond jubilee of Confederation.

Canadian investors are interested to the extent of many millions of dollars in Florida real estate, much of it in the neighborhood devastated by the storm, and it is feared that a heavy portion of the property loss will fall on residents of the Dominion.

Strange Method For  
Promoting Longevity

Biologist Says Decapitated Butterflies Live Longer Than Others

The strangest method ever devised for the promotion of longevity has just been presented to the British Academy of Sciences by Father Camille, a missionary in Madagascar, who, in addition to his missionary activities, has for many years pursued biological studies which have gained him a reputation as a scientist.

Briefly, his conclusion is that decapitated butterflies live longer than their fellows, who are left as Nature made them.

Some fifteen years ago M. Edmond Perrier reported to the Academy of Sciences his discovery that if certain caterpillars were decapitated in such a way as to cause the minimum loss of blood, they would continue the natural course of their development, and, after passing through the chrysalis stage, emerge as perfectly healthy but headless butterflies. He found that those which he decapitated lived longer than the others.

Scientists who have studied the phenomenon have come to the conclusion that this is simply because they lead a much less active life. A perfect butterfly quickly spends his strength in activity, whereas his headless fellows, leading much more placid lives, wear out their vital forces at a slower rate, and thus attain a comparatively ripe old age.

Canadian Flour for Brazil  
With a view to developing an even greater market in Brazil for Canadian mill flour, an experimental full cargo left Montreal recently destined to Santos, the port for Sao Paulo, Brazil. This is the first full cargo of flour—amounting to 5,000 tons—taken to Brazil direct from a Canadian port. Heretofore much of the Canadian flour going to Brazil has been taken by rail to New York and there loaded on steamers sailing south.

A horse race at the Fair may be well enough, but trying to beat the iron horse to the crossing is hardly a "sport"—unless the coroner enjoys it.

W. N. U. 1648

Canadian Colonization  
By Chas. M. Peterson

In a vast country like Canada, containing within its boundaries so great a wealth of natural resources, there should be only two major problems in public policy, first to provide for the gradual development of these resources by the introduction of new capital and by promoting a healthy increase in the working population, and secondly, to direct the growth for and distribution of such new population as to insure, as far as possible, that their energies shall be devoted to such occupations as will ensure a fairly balanced national production. Canada's present primary need is an increased rural production and consuming population. With this need supplied, our industrial and transportation plants would be working overtime.

It is not difficult to comprehend that the days of easy colonization in the field of immigration are over. Our free, high quality lands are practically gone. The economic situation in Europe is such that people with capital are no longer available for settlement on our lands in large numbers. The social revolution in the Old European civilizations—for it has been nothing less, has made the lot of the "under dog" vastly better than it ever was in so far as elimination of the fear of the consequences of sickness and unemployment is concerned. Steamship fares have been trebled. Canada must wake up to the uncomfortable fact that to obtain results even anywhere near approaching those of former days, and must be considered absolutely inadequate in view of our present urgent population requirements—it will be necessary to pursue policies vastly different to those of the past and present.

We must, more or less, forget the meaning of the term "immigration" and learn the significance of the word "colonization." Nothing short of a comprehensive plan involving the actual placing of people on the land, followed by an intelligent, friendly interest in their welfare for a couple of years after settlement will bear fruitful results. It will be absolutely essential to provide financial assistance to worthy, selected families to enable them to make the move. Canada must acquire the habit of thinking in terms of tens of millions of dollars if we are to get anywhere with an effective plan of agricultural development.

Intelligently handled investment we can make will yield greater returns than providing a large capital to be utilized as direct loans to inexperienced farmers settling on our vacant spaces, at a very low rate of interest with a repayment period of from 20 to 30 years, this capital to constitute a revolving fund. Private interests have not hesitated to adopt this policy in the west in a volume running into millions. The only bona fide colonization in Canada today is, in fact, secured on this basis. The first prairie settlement of Western Canada was organized on that plan. The early Mennonite colonization in Manitoba was based on Federal financial assistance. \$100,000 was advanced to these people and faithfully repaid, with 6 per cent interest, in full, within six or seven years.

No class of people have a greater interest in the solution of our population problem than the country towns of Canada, where development has been comparatively slow for many years. Added population will give them increased trading life and, in Eastern Canada at least, lead to the establishment of prosperous local industry, because the decided tendency now is for industrial concerns to locate in the smaller communities, where the cost of living is more moderate than in the large cities and where general conditions for labor are most favorable, entirely aside from the fact that the burden of taxation would be much lighter. With an increased producing and consuming population our smaller urban centres will again become what it has been in the past, and in other countries, the backbone of the nation.

A New Method of Freezing Fish  
A successful experiment with a new process for the rapid freezing of fish was carried out recently here by members of the Atlantic Experimental Station for Fisheries. Experiments and fish were frozen in strong brine in 30 minutes, compared with 24 hours required by the usual process of air refrigeration. It is claimed that the freezing of fish in the shorter time will result in better flavour as well as more rapid transportation to market.

A Two-ounce Frock  
Women's frocks by envelope! Recently a London girl, wishing to send a frock to a friend, folded it neatly, placed it in a large office envelope and mailed it for the ordinary letter post. The dress weighed two ounces.

Every circumstance you meet contains something for you.

## Famous Singer To Visit West.

MADAME AMELITA GALLI-CURCI  
The greatest singer of the age, who will sing in the Stadium at Regina, Thursday, October 14th. This will be the only concert in Saskatchewan.

1377  
A Smart Frock of Plaid For School Or Play

Shirtings always form an attractive trimming on frocks for the little lass from four to twelve years of age. This attractive model has a boyish collar and a yoke extending in a panel down the front. The long sleeves are gathered into narrow wrist-bands, and are marked for a shorter length, too. 1377 is in silk 4, 6, 8, 10 and 12 years. Size 8 requires 2 1/2 yards 36 inch gingham, or 1 1/2 yards 64 inch plaid flannel or jersey cloth. 20 cents.

The designs illustrated in our new Fashion Book are advance styles for the home dressmaker, and the woman or girl who desires to wear garments dependable for taste, simplicity and economy will find her duties fulfilled in our patterns. Price of the book 10 cents the copy.

## Made Fastest Flight

French Air Pilot Flew Nearly 300 Miles an Hour

Adjutant Bonnet, the French aeroplane pilot, has moved faster than any other man in the world. In a Bernardi monoplane, with a Hispano-Suiza engine, he has flown at 274.8 miles an hour.

Speed records, for many reasons, are made close to the ground (writes Major Oliver Stewart). A level course is marked out with data containing observers and electrical timing apparatus at each end. The aeroplane, rushing along ten or fifteen feet above the grass, approaches the "speed corner" from four or five miles away, and is going "full-out" about a mile from the first hut.

So close to the ground the impression of speed, even at 150 miles an hour, is emphatic. At the speed Adjutant Bonnet has attained the wind would be circling around the windscreen and playing on the sides of the pilot's helmet with the force of a fire hose. The full-throated roar of a 600 h.p. engine at arm's length in front of him would be drowned by the howling caused by the machine drilling its way through the air.

If he raised a hand high above the edge of the cockpit, his arm would be broken by the air blast. If he put his head round the side of the windscreen he would be suffocated.

## France Produces Own Dye Stuff

Production of This Material Nearly Doubled During Past Five Years

The production of dye stuffs in France has been steadily increasing since 1920 and, according to advice received by the Bankers Trust Company of New York, from its French industry service, the annual report of the Union for promoting this industry (Union des Producteurs et des Consommateurs pour le développement de l'industrie des matières colorantes en France) shows that production of dye stuffs, which in 1925 totalled 1,297 tons and in 1924, 2,414 tons, aggregated 1,451 tons in 1925. Imports from Germany accounted for 388 tons only; whereas before the war French industry was largely dependent on that country for such products.

The output of French factories has nearly doubled during the last five years; the exact figures being 14,549 tons in 1925 as against 7,356 tons in 1920.

## Disastrous Extravagance

Extravagance, Whether National or Personal Can Only End in Disaster

"The decay of commercial probity," of which the report speaks is traced largely to the habit of people living beyond what they can afford. It is to be feared that this explanation is only too true. These "reckless attempts to live more or less luxuriously without rendering any services in return" are a noticeable feature of the age. Extravagance, whether national or personal can only end in disaster, but, though the country is infinitely poorer than before the war, many people are trying to maintain "the same or even a higher standard of living." London Daily Mail.

## Claims for Wheat Leakages

On last year's business the Claims Dept. of the Pool, in Winnipeg, which looks after claims for leakages in platform cars, as well as cars shipped through pool elevators, recovered approximately \$23,000, for its membership from the railways, as a result of successful claims.

A woman's missing sense of humor has saved many a man from making a fool of himself.

The fountain plays because the water works.

## Receives New Appointment

MR. ALPHONSE BRAZEAU

In recognition of his excellent work among his compatriots in western Canada and as a compliment to the French speaking element west of the Great Lakes, Mr. Alphonse Brazeau has been appointed Travelling Passenger Agent of the Canadian National Railways, with headquarters in Winnipeg, and he will be detailed to the special duty of caring for the passenger traffic requirements of the French-Canadian of the west. For several years Mr. Brazeau has acted as a liaison officer between the company and the French Canadians and he was prominent in organizing the Franco-Canadian Tour from the west to St. Anne de Beaupre last December. The largest single party to travel from western Canada to Quebec, and one of the largest individual passenger movements in the history of the railroad. He also assisted to organize the western delegation to the Eucharistic Congress at Chicago last June and he personally conducted these pilgrimages. His popularity among his compatriots is attested to by the formal addresses of confidence and gratitude which have been presented to him by one of the parties whose traffic requirements he has undertaken to satisfy. Mr. Brazeau is of French parentage and speaks French and English with equal facility. In choosing for this important post the Canadian National Railways are adhering to a policy characteristic of Sir Henry Thornton's regime, namely, to appoint French Canadians to posts having to do with the French speaking population.

In selecting Mr. Brazeau for this important work the company has chosen a man who, to an engaging personality and the qualities already mentioned, is able to add many years of varied experience in railroad work. Mr. Brazeau was born in Ottawa on October 14th, 1883, the son of a railroad man himself. He was educated at Ottawa University and in 1901 he went to Toronto to commence his railroad career in the Baggage Department of the Toronto Terminal Company. He occupied various positions there until 1921, when he removed to join the staff of the Grand Trunk Pacific as Train Agent. In 1921 he was transferred to Winnipeg where he was Ticket Collector until 1923, when he became Terminal Passenger Agent, a position he has held since.

## Walking Cures The Blues

Charges Blood With Fresh Oxygen and Tones Up the Brain

If you are feeling a bit blue, inclined to melancholy, or pessimistic, a good brisk walk ought to clear it all away. To a person who is normally cheery, a feeling of pessimism is a sure sign that all is not right with the system. What has probably happened is this. There has not been enough exercise lately and the simple action of breathing has slowed down. When the breathing slows down the circulation of blood becomes languid, and with a lowered circulation the brain is affected.

Instead of the brain being kept clear and fresh, stale blood collects, and the action of the brain is slowed down. And the effect of this is very often pessimism.

A brisk walk sets the heart going strongly, and automatically the breathing becomes deeper. In this way, not only is the circulation speeded up, but the blood is charged with fresh oxygen, which tones up the brain.

SUNDAY SCHOOL LESSON  
OCTOBER 3

ISRAEL JOURNEYING TOWARD CANAAN

Golden Text: Come thou with us, and we will do thee good. Numbers 10:29.

Lesson Numbers 10:11-36.

Devotional Reading: Psalm 34:7-9.

Explanations and Comments

The Story From Sinai, verses 11-28. The children of Israel had left Egypt an undisciplined rabble. Now they are an orderly team. Each tribe has its appointed place on the march. Everything is ready for breaking camp. An indication of the divine will is awaited.

And it came to pass in the second year, in the second month, on the twentieth day of the month, that the signal was given—the cloud which had been resting over the tabernacle was lifted. The Lord said to Moses, "The cloud will be lifted, and thou shalt say, 'The Lord is leading the march; and the world will be his conquest.' The Lord is leading the march, and his presence is your rear-guard (Isa. 52:12)." (Dr. F. B. Meyer).

The soul must visit Sinai, but cannot live there. It must journey forth to Taber, Calvary and Olivet. The Church of God is moving on. The world is being won. The Lord is leading the march, and his presence is your rear-guard (Isa. 52:12)." (Dr. F. B. Meyer).

## England's Small Railways

Country Can Boast of Two Smallest in World

England may not be able to boast the largest public railway in the world, but she has no hesitation in claiming to possess the smallest. Indeed, notices to that effect are posted on the line running from Ravensla, the old Roman port in Cumberland, to Boot, under the shadow of Skiddaw. It is only seven miles long, its gauge is fifteen inches, and the engines are exact replicas in miniature of the express engines built for broad gauge lines. Each locomotive is about two feet and a half high and with its tender measures just 8 inches in length. As for the carriages, they resemble church pews, being open on all sides and without roofs. So in rainy weather it is a common sight for the train to arrive with its passengers holding up umbrellas. The carriages only hold two people a side, four to the compartment. The track was originally laid to accommodate the mines at Boot, the coal for the small steam locomotives and the equipment of five engines, twenty passenger coaches and forty goods trucks, totalling about twelve thousand pounds, amounting to \$60,000. During the summer season the line is used by the local school children.

England has another tiny railway in the shape of the Ramsey-to-Hythe line, with its five stations, its track of fifteen-inch gauge and its two engines, each one-third the size of an ordinary British engine. This road is not yet completed, but will have cost about \$200,000 when placed in operation.

## Thinks Canada Wonderful

New Zealander Is Impressed by First Visit to This Dominion

"Canada is a wonderful country and I have been delighted and interested since I crossed the border into the Dominion," said J. P. Hoeking, of Auckland, New Zealand, a lecturer and a governor of the university of Auckland.

Mr. Hoeking has been travelling through the United States and Canada studying economic and municipal affairs, and particularly matters concerning the proper development of a population.

Regarding his travels through Canada, Mr. Hoeking said: "Montreal proved of great interest, but my stay in Quebec where, the medieval and modern of the city is an experience never to be forgotten."

## Canada Is Painting Up

The consumption of paint and varnish is considered a very good indication of general prosperity throughout a country. Based on this principle, prosperity in Canada is decidedly on the up grade, according to a statement just issued by the Dominion Bureau of Statistics, which shows an increase of 19 per cent in production of paint, pigments and varnishes in Canada during the year 1925 as compared with the previous year. The production in 1925 was valued at \$22,284,269.

### CHAPTER XV—Continued

When he was satisfied of his observations, which occupied hardly more than a brief hesitation, Lord Teddy moved closer on the cushioned divan—only the knee, which was crossed and pointed his way halted him. His voice, when he spoke, was pleasant—a murmur.

"Please," he pleaded, "don't let us pretend. It's much easier not to, really. You do it splendidly but you couldn't be wholly successful. When a woman has had so much experience, old enough, you know, so that even she knows there's nothing new under either the sun or the moon for her, then she has to pretend that she hasn't yet learned that everything is what it is and not what it's copy book. If she didn't she'd be too foolish to know we know she's serious about it. But when a lovely girl makes believe she doesn't understand everything and everybody we know she's just mawkish. Because she thinks she does, anyway. Don't you?"

Joanna regarded him elaborately, frankly imitating his own examination of her a moment before. "Yes," she said, her inscrutable smile playing up on him. "Then you go away with you—as a teacher, a supervisor, a diploma, or some good references or things like that?" His ready laughter bubbled through his mask of seriousness.

"Only experience, my lovely Jo-

anna," he said, finding her hand among the cushions and taking possession of it with both of his own. "My experience will have to be your guide, and yours my ambition." When he had finished he gave her limp, fragile fingers a confidential pressure, and looked in to her own shining eyes with a deep smoulder in his. She seemed to be unconcerned about her hand. She even moved her knee, a little, to help him out down the space between them. She said, then:

"I never forgive a man anything," she declared, promptly. "It always makes him kinder than I usually do. I thought you must be something different, and I couldn't think of anything but staid girl and dancing girls. As a rule they're got sense, any way. The debutantes that imitate them haven't—by the same rule. Now am I forgiven?"

"I never forgive a man anything," she declared, promptly. "It always makes him kinder than I usually do. ## CARRIED WIFE TO BED

Suffered So She Could Not Walk. Restored to Health by Lydia E. Pinkham's Vegetable Compound

Mineau, Ontario.—"I am a practical nurse and I recommend Lydia E. Pinkham's Vegetable Compound to suffering women. For three months I was almost helpless and could not sit at the table long enough to drink a cup of tea. Many a time my husband carried me to bed. I would be so weak. Then he read in the paper of a woman suffering as I did who got better after taking the Vegetable Compound, so we went and got it for me. When I had taken three bottles I was just like a new woman and have had splendid health ever since. When I feel any bearing-down pains I always take it; sometimes a half bottle or whatever I need. It is my only medicine and I have told many a woman about it. Any one wanting to know more about Lydia E. Pinkham's Vegetable Compound, I will gladly write to her. I do all I can to recommend it for I feel I owe my life and strength to it. Lydia E. Pinkham, R.R. 1, Mineau, Ontario. Do you feel broken-down, nervous, and weak sometimes? Do you have this horrid feeling of fear which sometimes comes to women when they are not well? Lydia E. Pinkham's Vegetable Compound is excellent to take at such a time. It always helps, and it takes regularly and persistently will relieve this condition."

W. N. U. 1648

him puzzled her. She couldn't see how he would be easily in his thirties, but, already she was becoming accustomed to older men than her "dancing boys" and "beers." John, always, had appeared older to her than any of the other chaps she knew, although he wasn't in years. She was astonished, secretly, at her own ability to be interesting to men who must have seemed many apprehensively, at more dazzling thrills than her's.

She was still disturbed by that ready supposition of his at their sudden meeting earlier in the afternoon. She reminded him of it again, and declared that she wouldn't be satisfied with him until he had made satisfactory explanation. He was not abashed.

"You were such a surprise," he assured her. "Not at all like the usual girl one sees about, in places. I'm fully fed up, you know, on rich, most girls, I mean. They're not their enthusiasm. You're enthusiastic. Sort of caught me up sharply with it. And you haven't been spoiled. The girls one meets nowadays seem to be spoiled; that is to many of them. The kind I know, they're the daughters of the crowd that have chow dogs, you know. Funny, but it has always struck me that when a woman gets a chow dog her daughter goes to the devil. Really doesn't go to the devil, you know, but tries to act like she has been to him and found him too old-fashioned to be amusing. Now you're different. As soon as I saw you I was sure there were no chows in your family. Any more?"

"Not having any family, there aren't any," she said, quietly.

"Right! There's a reference for you. You see, I'm always right about women. You're a flapper without a chow background. There's a heap of difference. If I were a literary chap, now, I'd put that in a book, or something. As it is you'll have to figure it out yourself. It's deeper than I usually do. I thought you must be something different, and I couldn't think of anything but staid girl and dancing girls. As a rule they're got sense, any way. The debutantes that imitate them haven't—by the same rule. Now am I forgiven?"

"I never forgive a man anything," she declared, promptly. "It always makes him kinder than I usually do. I thought you must be something different, and I couldn't think of anything but staid girl and dancing girls. As a rule they're got sense, any way. ## Take a REAL HOLIDAY this FALL!

Go to Europe! It's your slack time here in Canada, but in England, the social season, with all its life and amusement, is just getting into its stride. The lights of London are beckoning—the theatres and shops offer a diversity of interests and pleasures.

Plan now to make the crossing on a Cunard or Anchor-Donaldson ship, here in Canada, by the Class Steamer. You will find the trip itself a most enjoyable experience. Sailing from Montreal means a thousand miles of sheltered river travel before you come to the open sea which is crossed in a few delightful days.

Ask your steamship agent about the St. Lawrence route. Sailing winter.

THE CUNARD STEAMSHIP CO. LIMITED,  
270 Main Street,  
Winnipeg, Man.

presented. I fancy you'll be properly

Joanna looked up sharply at the mention of Brandon and Kenneth. She detected a change in Yvonne's tone as she pronounced the names. She wanted to ask her about these two, for she knew Yvonne shared with Brandon, at least, some intrigue concerning her. But she thought better of the impulse. Her thoughts went back to John.

"Have him come to you here, by all means," Yvonne insisted, shrewdly. "I fancy he is a young man who will require handling, if you continue to be concerned about him. Shall you—be much concerned about him?" The suddenness of the challenge caught Joanna off her guard. She dropped her eyes. All at once she was conscious that her lips were quivering, and that she was concerned. It wasn't quite straight in her mind, but she had put away something Teddy Dominator had said for later consideration. And it came back to her, now a little confusedly. "She was enthusiastic. But a flapper without a chow background. And you haven't been spoiled."

She wondered why John had not understood as well as Teddy Dominator. She decided she'd find out, soon. "I shan't be so much concerned," she said to Yvonne, "that I'll go around hunting sad music!"

(To be continued)

It has Many Qualities—The man who possesses a bottle of Dr. Thomas' Electric Oil is armed against many ills. It will relieve a cough, break a cold, prevent sore throat; it will reduce the swelling from a sprain, relieve the most persistent sore and will speedily heal cuts and contusions. It is a medicine chest in itself.

## Little Helps For This Week

The Lord thy God shall bless thee in all thy works, and in all that thou putteth thine hand unto.—Deut. xiv, 10.

What is our duty here? To tend from good to better, thence to best; to pluck the flowers that round us blow. Scattering our fragrance as we go.—Sir J. Bowring.

To make some noise of God's creation a little fruitfulness, better, more worthy of God, to make some human hearts a little wiser, manful, happier, more blessed, less accursed—it is a work for a god.—Thomas Carlyle.
